

## **BUILDING INSPECTIONS**

Inspections are required for all permits that are issued. The type and number of inspections required depends on the type of work that is being done. Contact the Building Department at (408) 777-3228, for specific project information.

Building inspections may be scheduled between the hours of 7:30 a.m. to 3:30 p.m. Monday through Thursday and 7:30 a.m. to 2:30 p.m. on Friday by calling (408) 777-3228. When calling for an inspection, you will need to provide the permit number, address, type of inspection, day desired and contact name and phone number. To schedule an inspection for the next day you will need to call before 3:30 p.m. the previous day. Any inspection requests after this time will be scheduled for the next available day. The inspectors receive that day's inspections early in the morning and will give a two-hour window of time approximately of when the inspection will occur. This two-hour window does not guarantee that time frame since there are many variables that can arise, but in most cases is attained. Morning inspections are from 7:30 a.m. to 11:30 a.m. and afternoon inspections are 12:30 p.m. to 4:00 p.m. Monday through Thursday and until 3:00 p.m. on Fridays.

### **SCHEDULING FIRE INSPECTIONS**

Fire Inspections can be scheduled by calling (408) 378-4010.

### **SPECIAL INSPECTIONS**

Certain types of projects and construction methods require special inspections to be completed by a special inspection agency. Any required special inspections will be noted on the permit and plans. Refer to the Special Inspection List (PDF) for special inspectors.
