## CITY OF CUPERTINO ANNUAL PAVEMENT MAINTENANCE PROJECT

The City of Cupertino Public Works Department is responsible for the City's 142 mile network of streets. This valuable asset requires periodic inspection and maintenance to insure that the correct treatment is applied at the appropriate time. Depending on the condition of a street, many treatment methods may be available.

Your street is scheduled to have pavement maintenance work completed in the near future. Work may include milling of the edge of asphalt, leveling of the street surface with asphalt and/or full width overall of asphalt. These treatments will extend the useful life of the street by many years.

## Pavement Maintenance Process

---

Within the next few days, the City's competitively selected contractor –**De Silva Gates Construction**, will begin the process of milling of the edge of asphalt, leveling of the street surface with asphalt and/or full width overall of asphalt on your street.

Work will occur in phases over a period of several days. A minimum of 48 hours prior to work, your street will be posted for "No Parking". The work may consist of:

- Milling of the edge of asphalt
- Leveling of the street surface with asphalt
- Full width overall of asphalt
- Replacement of traffic markings and striping, if needed

Your street will remain open to local traffic for the majority of the work, but do anticipate some additional travel time while the work is being completed. Thru traffic on your street maybe affected during some steps of the process. **Emergency vehicles will have access at all times.**

If work occurs on your garbage/recycle pick up day, please place your garbage/recycling containers out as usual. Recology will make every effort to collect waste prior to 8:00 a.m.; otherwise, pick up will take place the following day.

Please observe the posted times on the "No Parking" signs by both the parking of your vehicle and use of the street. **All vehicles left on the street will be towed at the owner's expense.**

## Locations and Notification

---

All work is dependent on scheduling and weather. The City sends this flier in advance to homes and businesses along affected streets.

## Benefit of Timely Pavement Maintenance

---

- Helps prevent future and more costly deterioration of the street
- Improves ride ability
- Enhanced appearance
