

Candidate Statement for Val Vitols

Occupation: Retired

Age: 66

Everything is already in place. My role as the NuManagement is to support Clean Air, Clean Water, and Clean Food.

It is to Support Community involvement and connection to its own process. The NuPolitics is not here to Fix anything. The residents and city employees have their own positions and already know what to do. They are good at what they are doing.

Community and social driven projects instead of profit driven projects build solid relationships where honest economics can take place in a sustainable way. In other words encouraging human capital paves the way for prosperity.

Let us be real about what is taking place. The planet is not in good shape. Our survival depends on people making better choices. Not on any new policy, law or regulation. Have any solutions really made a difference? Let us wakeup to what makes sense. Let us build a community that supports itself and supports each other.
