

# PROJECT OVERVIEW

The City is moving forward on a feasibility study to develop a 5-mile trail along the Union Pacific Railroad right-of-way connecting the existing Snyder Hammond Loop-Trail with “Joe’s Trail” in Saratoga. This phase study will be focused on developing a **community vision** for the trail and answering technical questions about its **design and probable costs**. To reflect your needs, please help us answer these questions:

- How could this trail serve you and your family?
- Where can communities connect to the trail?
- Which street crossings would need to be improved to feel comfortable?
- What type of amenities (benches, landscaping, drinking fountains) would improve your trail experience?
- Where should these amenities be placed along the trail?

At the conclusion of this process, City Council will make a decision about how best to move forward. **No funding has been identified** for construction.
