
PROTECT YOURSELF FROM BEING HACKED ON THE WILD, WILD INTERNET

Tuesday, June 25, 10 - 11 a.m.
Cupertino Community Hall
10350 Torre Avenue

Learn how to feel safe and secure and make sure your privacy is not compromised while using the internet. Attend this informal presentation on the basics of cybersecurity and find out about the following:

- Why do you need to protect your digital persona?
- What are the most common ways hackers can steal your personal data?
- How can you improve your cyber hygiene by following a few best practices?

*Hosted by the City of Cupertino's
Technology, Information &
Communication Commission*

Presenter
Narayan Makaram,
Information Security Consultant
