Attention: Ms. Susan Chen

Subject: ASTM Phase I Environmental Site Assessment  
Cupertino, California

Dear Ms. Chen:

The enclosed report presents the results of a Phase I Environmental Site Assessment (Phase I) conducted at the property located adjacent to Stevens Creek Park, Linda Vista Park, and Canyon View Drive, Santa Clara County Assessor's Parcel Numbers (APNs) 356-05-007, 356-05-008, and 356-27-026, Cupertino, California (herein referred to as the "subject site" or "site"). This Phase I was conducted in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process as referenced in 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule).

The objective of a Phase I is to assess whether known and suspect "*recognized environmental conditions*" (RECs), *historical RECs* (HRECs), or *controlled RECs* (CRECs) are associated with the subject site, as defined in the ASTM E 1527-13 Standard, by evaluating site history, existing observable conditions, current site use, and current and former uses of adjoining properties as well as potential releases at surrounding properties that may impact the subject site.

This Phase I has not revealed evidence of RECs, HRECs or CRECs associated with the subject site.

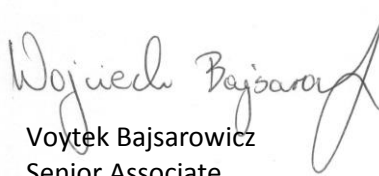

SC Design Group  
19 April 2018

## Executive Summary

Haley & Aldrich, Inc. (Haley & Aldrich) performed a Phase I Environmental Site Assessment (Phase I) of the property located adjacent to Stevens Creek Park, Linda Vista Park, and Canyon View Drive Santa Clara County Assessor's Parcel Numbers (APNs) 356-05-007, 356-05-008, and 356-27-026, Cupertino, California (herein referred to as the "subject site"). The scope of work is described and conditioned by our proposal dated 16 March 2018. This Phase I was performed for SC Design Group who seeks to assess the current environmental condition of the subject site for proposed residential development. This Phase I was performed in conformance with the scope and limitations of the ASTM E 1527-13 Standard and [All Appropriate Inquiries \(AAI\)](#) Rule.<sup>1</sup>

### SUBJECT SITE DESCRIPTION

The subject site consists of approximately 86 acres of undeveloped land in the City of Cupertino. The subject site is undeveloped with dense vegetation and several trails. The site is currently used by hikers.

### OBJECTIVE

The objective of a Phase I is to assess whether "[recognized environmental conditions](#)" (REC), [historical RECs](#) (HREC), and [controlled RECs](#) (CREC) are associated with the subject site. Our conclusions are intended to help the user evaluate the "[business environmental risk](#)" associated with the subject site. Our opinion regarding a REC's potential impact on the subject site is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intention to assess the environmental condition of the subject site prior to possible lease of the property and on-site buildings.

### RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-13 Standard defines a REC in part as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a [material threat](#) of a future release to the environment."

RECs were not identified in connection with the subject site.

### CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-13 Standard defines a CREC as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

---

<sup>1</sup> American Society for Testing and Materials (ASTM) E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process as referenced in 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule) ("ASTM E 1527-13 Standard"). Specified terms as are used in ASTM E 1527-13 are highlighted in blue in this report and defined in the Glossary at the end of the report text.

CRECs were not identified in connection with the subject site.

### **HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS**

The ASTM E 1527-13 Standard defines an HREC as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

HRECs were not identified in connection with the subject site.

### **DE MINIMIS CONDITIONS**

The ASTM E 1527-13 Standard defines *de minimis* conditions as those conditions which “do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” The ASTM E 1527-13 Standard notes that “conditions determined to be *de minimis* are not recognized environmental conditions.”

*De minimis* conditions were not identified in connection with the subject site.

### **OTHER ENVIRONMENTAL CONCERNS**

Gravel mining operations occurred on-site in the early to mid 1970s. Drilling or blasting were reportedly not performed at the site. Former mining operations and use of heavy equipment have the potential to have released hazardous materials at the site. If the area of the former gravel mine quarry is planned for future development, the area should be further evaluated for potential historical impacts.

# 1. Introduction

This report presents the results of an ASTM Phase I Environmental Site Assessment (Phase I) conducted at the property located adjacent to Stevens Creek Park, Linda Vista Park, and Canyon View Drive, Santa Clara County Assessor's Parcel Numbers (APNs) 356-05-007, 356-05-008, and 356-27-026, Cupertino, California (herein referred to as the "subject site" or "site"). The subject site consists of three parcels of undeveloped land totaling approximately 86 acres.

## 1.1 OBJECTIVE

The objective of a Phase I is to assess whether "[recognized environmental conditions](#)" (REC), [historical RECs \(HREC\)](#), and [controlled RECs \(CREC\)](#) are associated with the subject site by evaluating site history, interviews, existing observable conditions, current site use, and current and former uses of adjoining properties as well as potential releases at surrounding properties that may impact the subject site. Our conclusions are intended to help the user evaluate the "[business environmental risk](#)" associated with the subject site.

RECs are defined in the ASTM E 1527-13 Standard as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or under conditions that pose a [material threat](#) of a future release to the environment." The definitions of RECs, HRECs, and CRECs are included in the Glossary section of this report.

## 1.2 SCOPE OF SERVICES

This work was performed by Haley & Aldrich, Inc. (Haley & Aldrich) and this Phase I was performed in conformance with the scope and limitations of the ASTM E 1527-13 Standard and [All Appropriate Inquiries \(AAI\)](#) Rule<sup>2</sup> and in accordance with our agreement with SC Design Group dated 19 March 2018. The Phase I Limitations and Agreement are attached hereto as Appendix A.

As part of this Phase I, Haley & Aldrich conducted visual observations of site conditions and of abutting property use (site reconnaissance); reviewed federal, state, tribal, and local environmental database information, federal and state environmental files, previous reports (if identified and provided), and site historical use records; and formulated conclusions regarding the potential presence and impact of RECs.

## 1.3 NON-SCOPE CONSIDERATIONS

The ASTM E 1527-13 Standard includes the following list of "additional issues" that are non-scope considerations outside of the scope of the ASTM Phase I practice: asbestos-containing materials, biological agents, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered

---

<sup>2</sup> American Society for Testing and Materials (ASTM) E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process as referenced in 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule) ("ASTM E 1527-13 Standard"). Specified terms as are used in ASTM E 1527-13 are highlighted in blue in this report and defined in the Glossary at the end of the report text.

species, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, and mold. These items were not included in this Phase I of the subject site.

#### **1.4 LIMITING CONDITIONS/DEVIATIONS**

Haley & Aldrich completed this Phase I in substantial conformance with the ASTM E 1527-13 Standard. In our opinion, no additions were made to or deviations and deletions made from the ASTM work scope in completing this Phase I.

#### **1.5 USER RESPONSIBILITIES**

The completion of this Phase I is only one component of the process required to satisfy the AAI Rule. In addition, the user must adhere to a set of user responsibilities as defined by the ASTM E 1527-13 Standard and the AAI Rule. User responsibilities are discussed in Section 6.6 of this report. A user seeking protection from Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability as an innocent landowner, bona fide prospective purchaser, or contiguous property owner must complete all components of the AAI process in addition to meeting ongoing obligations. AAI components, CERCLA liability relief, and ongoing obligations are discussed in the AAI Rule and in Appendix XI of the ASTM E 1527-13 Standard.

## 2. Site Description

A description of the subject site is detailed in the sections below. Refer to Figure 1 for a project locus and Figure 2 for a site plan showing relevant site features.

### 2.1 SITE OWNERSHIP, LOCATION, AND VICINITY DESCRIPTION

Site Description	
Owner	Lixin Chen Qing Xiang Li
Operator/Occupant	None
Current Site Use	None, open space
Size	Approximately 86 acres
Building Square Footage (approximate)	N/A
USGS 7.5 Minute Topographic Map	Cupertino, CA 2012
Site County	Santa Clara County
Zoning	RHS (Residential Hillside Zoning Ordinance)
Parcel Information	365-05-007 – 50.26 acres 365-05-008 – 2.188 acres 365-27-026 – 33.66 acres
Utilities	Water: None
	Sewerage: None
	Electricity: None
	Natural Gas: None
Heating/Cooling System	N/A

Site Vicinity Description	
General Area Description	Undeveloped area covered with vegetation.
Adjoining Property Description	West: Steven Creek County Park
	North: Linda Vista Park and Stevens Creek
	East: Single family homes
	South: Undeveloped land and single family homes

## 2.2 PHYSICAL SETTING

Subsurface explorations and/or hydrogeologic investigations were not performed for this Phase I. Subject site geology and hydrology were evaluated on the basis of readily available public information or references, and/or based upon our experience and understanding of subsurface conditions in the vicinity of the subject site. It is unknown to what extent localized variations in groundwater depth and flow occur on the subject site.

Physical Setting		Source
Topography Summary	The subject site consists of several steep hills, generally sloping to the northwest.	1, 2
Site Elevation	Site elevation ranges from approximately 440 to 720 feet above mean sea level.	1, 2
Overburden Soils	Soil type at the site is Azule silty clay loam.	3
Bedrock Formation	Bedrock in the Cupertino area is a composite Mesozoic basement assemblage consisting of the Franciscan Complex, the Coast Range Ophiolite, and the Great Valley Sequence.	4
Depth to Groundwater	Depth to groundwater was not determined.	
Surface Water Flow Direction	Surface water flows away from the site in all directions, as the site is located on elevated hills.	1
Regional Groundwater Flow Direction	Groundwater flow direction is assumed to be to the west, following topography toward Stevens Creek.	1
Nearest Surface Water Body	Stevens Creek runs south to north along the northwest side of the site. A seasonal tributary to Stevens Creek runs south to north through the western area of the Site.	1, 2

Environmentally Sensitive Areas		Source
Floodplain	A majority of the Site is listed as a 500-year flood zone. The adjacent property northwest of the Site along Stevens Creek is listed as a 100-year flood zone.	2
Mapped Wetlands	No wetlands are noted at the site. A small area approximately ½ mile east of the site is listed in the National Wetland Inventory.	2

### 3. Previous Reports

A previously prepared Phase I report for the subject site from 1999 was provided for review as part of this Phase I, and is included in Appendix B. The Phase I included the adjacent property to the west, APN 351-19-043.

- Phase I Environmental Site Assessment Update, McDonald Dorsa Property Cupertino California, prepared by Dames & Moore, Inc., dated 22 November 1999.

The Phase I report identified past uses of the subject site, which included gravel mining in the 1970s and horse stables in the 1980s. According to personnel with knowledge of the mining operations, no drilling or blasting was performed. No evidence of hazardous materials or releases to the environment were noted.

The Phase I report identified a 1-acre area on the western adjacent property, APN 351-19-043, near the intersection of Stevens Canyon Road and Ricardo Road that was operated as an unregistered landfill during the 1960s and 1970s. Dames & Moore indicated in their Phase I that this unregistered landfill area was remediated by the City of Cupertino in 1999.

## 4. Site History

Haley & Aldrich assessed past usage of the subject site and adjoining properties through a review of:

- Aerial Photographs dated 1948, 1950, 1956, 1963, 1968, 1974, 1991, 1998, 2006, 2010, and 2014;
- Topographic Maps dated 1887, 1889, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1980, 1995, and 2012; and,
- City Directories dated 1968 through 2014.<sup>3</sup>

Copies of information obtained from historical references reviewed are included in Appendix B. Unless otherwise noted below, per the ASTM standard, sources were reviewed dating back to 1940 or first developed use, whichever is earlier, and at 5-year intervals if the use of the property has changed within the time period.

### 4.1 SUBJECT SITE

The subject site is undeveloped with dense vegetation and several trails. The site is currently used by hikers. The north, east, and southern areas of the site are covered with steep hills, leading down to a flat valley in the western portion of the site.

The table below provides a detailed summary of pertinent information from the historical sources reviewed:

Dates	Description of Subject Site	Sources
1887 - 1953	The subject site is undeveloped. In the 1948 aerial photograph, a small area in the eastern portion of the Site may have included orchards.	Aerial photographs and topographic maps.
1956 – 1980	Signs of quarry activities in the western portion of the site appear starting in the 1956 aerial. In the 1961 to the 1980 topographic maps, a “gravel pit” is noted in the quarry area as well as a water tank in the northwest area of the site. Trucks and a small building appear in the 1963 aerial photograph related to quarry activities, as do dirt roads and trails.	Aerial photographs and topographic maps.
1991 – Present	By the 1991 aerial photograph, vegetation has started to grow over the quarry area and the mining operations appear to have ceased. The site remains undeveloped until the present day.	Aerial photographs and topographic maps.

### 4.2 ADJOINING PROPERTIES

The table below provides a summary of pertinent information from the historical sources reviewed regarding adjacent properties:

<sup>3</sup> Certified Sanborn Maps were requested; however, no historical maps were prepared for the Site.

Dates	Description of Adjacent Properties	Sources
1948 – 1963	Signs of quarry activities in the western portion of the site appear starting in the 1956 aerial. In the 1948 aerial, and in the 1953 to the 1980 topographic maps, a “gravel pit” is noted adjacent to the site to the northeast. Orchards appear to the east of the site in the 1948 - 1963 aerials. The golf course bordering the northern site boundary appears in the 1963 aerial.	Aerial photographs and topographic maps.
1966 – Present	Residential developments appear to the east of the Site in the 1968 aerial, and to the northwest and southwest of the Site in the 1991 aerial. Linda Vista park appears to the northeast of the Site in the 1991 aerial and 1995 topographic maps.	Aerial photographs and topographic maps.

## 5. Environmental Records Review

### 5.1 ENVIRONMENTAL DATABASE RECORDS SEARCH

Haley & Aldrich used the electronic database service, Environmental Data Resources (EDR®), to complete the environmental records review. The database search was used to identify properties that may be listed in the referenced agency records, located within the ASTM-specified approximate minimum search distances as shown in the table below. A description of each database searched is in Section 11.2 of this report. The complete environmental database report is provided in Appendix C. Pertinent information obtained from the database is summarized in Section 5.3 below.

Database Searched	Approximate Minimum Search Distance	Subject Site Listed?	Number of Sites within Search Distance <sup>1</sup>
1. NPL Sites	1 mile	No	0
2. Delisted NPL Sites	0.5 mile	No	0
3. CERCLIS Sites	0.5 mile	No	0
4. CERCLIS-NFRAP Sites	0.5 mile	No	0
5. Federal ERNS	Site only	No	Not Applicable
6. RCRA non-CORRACTS TSD Facilities	0.5 mile	No	0
7. RCRA CORRACTS TSD Facilities	1 mile	No	0
8. RCRA Generators	Site & Adjoining	No	0
9. Federal Institutional/Engineering Controls	Site Only	No	Not Applicable
10. State/Tribal Equivalent NPL Sites	1 mile	No	0
11. State/Tribal Equivalent CERCLIS Sites	0.5 mile	No	0
12. State/Tribal Registered Storage Tanks	Site & Adjoining	No	0
13. State/Tribal Landfills and Solid Waste Disposal Sites	0.5 mile	No	0
14. State/Tribal Leaking Storage Tanks	0.5 mile	No	3
15. State/Tribal Institutional Controls/Engineering Controls	Site Only	No	Not Applicable
16. State/Tribal Voluntary Cleanup Sites	0.5 mile	No	0
17. State/Tribal Brownfield Sites	0.5 mile	No	0
18. Orphan Site List <sup>2</sup>	Site & Adjoining	No	0

Notes:

1. Some sites may be included on multiple databases.
2. Haley & Aldrich also searched the [Orphan Site](#) List provided in the database report for the subject site and sites adjoining the subject site. Orphan sites are those that, due to incorrect or incomplete addresses, could not be mapped.

## 5.2 ADDITIONAL ENVIRONMENTAL RECORDS OR FILE REVIEW

To supplement the environmental record search, we contacted the following state and local government agencies and searched applicable online databases. If copies of the documents reviewed were obtained, pertinent material is included in Appendix C. Relevant information obtained is included in the appropriate sections of the report and/or discussed in Section 5.3 below.

Agency	Request Sent or Files Searched		Files Exist and Are Available for Review	Files Reviewed
	Subject Site	Adjoining Properties		
California Regional Water Quality Control Board (RWQCB), San Francisco Bay Region	Yes	Yes	A request was sent to the RWQCB on 26 March 2018, and the response indicated that they could not access records without a street address for the site and recommended using the online GeoTracker database. There were no GeoTracker files pertaining to the subject site or adjoining properties.	N/A
Department of Toxic Substances Control (DTSC)	Yes	Yes	A request was sent to the DTSC on 26 March 2018, and the DTSC responded that they had no files. Additionally, the DTSC's website, EnviroStor, generally contains all existing DTSC information on permits and corrective action at hazardous waste facilities, as well as site cleanup projects. There were no EnviroStor files pertaining to the subject site or adjoining properties.	N/A
Bay Area Air Quality Management District (BAAQMD)	Yes	No	A request was sent to BAAQMD, and no records related to the subject site could be found without a street address.	N/A
Santa Clara County Department of Environmental Health (SCCDEH) Local Oversight Program (LOP)	Yes	Yes	A request was sent to the SCCDEH on 26 March 2018, but a response was not received by the time of the issuance of this report.	N/A
Santa Clara County Fire Department (SCCFD)	Yes	Yes	A request was sent to the SCCFD on 29 March 2018, but a response was not received by the time of the issuance of this report.	N/A

Agency	Request Sent or Files Searched		Files Exist and Are Available for Review	Files Reviewed
	Subject Site	Adjoining Properties		
Santa Clara Valley Water District (SCVWD)	Yes	No	The SCVWD has an online database for Fuel Leaks and Solvents, which did not have any records for the subject site.	N/A
City of Cupertino	Yes	Yes	City of Cupertino provided documents related to the western adjacent property, known as the PH Property, which formerly contained an unregulated landfill. Files were mutual release agreements, other legal documents, and public meeting records where the site was mentioned. No information regarding the landfill operations releases to the environment, or the remediation conducted on this landfill by the City, were in these files.	Yes

### 5.3 DETAILED DESCRIPTION OF RELEVANT INFORMATION

#### 5.3.1 Subject Site

The subject site was not listed in any of the databases.

#### 5.3.2 Nearby Sites

Several sites were listed in the database report within the applicable search radii or identified in regulatory records reviews. Only those sites adjacent to the subject site and sites that were judged by Haley & Aldrich to have a potential to have impacted the subject site are discussed below. The complete database report and relevant records review information is included in Appendix C.

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Site
PH Property Western Adjacent Property APN 351-19-043 near the intersection of Stevens Canyon Road and Ricardo Road	N/A	The November 1999 Phase I report by Dames & Moore noted a nonpermitted landfill that operated at the western adjacent property during the 1960s and 1970s. The City of Cupertino took lead responsibility for investigating and remediating the former landfill. As of 1999, approval of the cleanup by Santa Clara County was pending.	No regulatory records of the environmental impacts, remedial efforts, or case closure of the former landfill were available for review. It is unlikely that landfill operations impacted the subject site as it is across Stevens Creek and at a lower elevation.

#### 5.4 VAPOR MIGRATION

As a part of this Phase I assessment, Haley & Aldrich conducted a preliminary vapor migration screen for potential chemicals of concern that may migrate as vapors onto the site as result of contaminated soil and/or groundwater on or near the site. The potential for vapor migration to the site was evaluated using a Vapor Migration Screening Matrix (VMSM). The VMSM included assessment of distance to the site from known soil or groundwater plumes. The critical distance was 100 feet for non-petroleum hydrocarbon contaminants and 30 feet for petroleum hydrocarbon contaminants.

Based on the completion of the VMSM, it is presumed unlikely that a potential vapor migration condition currently exists beneath the site. A copy of the VMSM is included in Appendix D.

## **6. Site Reconnaissance and Key Personnel Interview**

A site visit was conducted by Edison Ticken of Haley & Aldrich, on 4 April 2018. Mr. Ticken was accompanied by Leon Chen, the current property owner.

Haley & Aldrich observed all reasonably accessible areas of the subject site, including the property boundaries, and observed adjoining property conditions from the subject site boundaries and/or public thoroughfares. The central, lower area and southern sections of the site were inaccessible. The hiking path to these areas was deemed unsafe for passage. The areas were visible from afar, and the property owner noted that no signs of debris, impacts, or other disturbances were noted in these areas since his time of purchase in 2017. Mr. Chen also provided photographs of these areas, provided in Appendix E.

Per the ASTM E 1527-13 Standard, past owners, operators, and occupants of the subject site who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. At the time this Phase I was submitted, Haley & Aldrich was unable to contact or interview past owners or operators of the subject site. However, this is not considered significant to our conclusions.

The findings of the site visit and interviews are discussed below. Site photographs are included in Appendix E.

ASTM E 1527-13 Standard Section 10.8 requires that, prior to the site visit, the current subject site owner or key site manager and user, if different from the current owner or key site manager, be asked if there are any helpful documents that can be made available for review. Haley & Aldrich was provided with a previously prepared Phase I Environmental Site Assessment for the subject site, summarized in Section 3.

### **6.1 CURRENT USE OF THE PROPERTY**

The subject site consists of approximately 86 acres of undeveloped land in the City of Cupertino. The subject site is undeveloped with dense vegetation and several trails. The site is currently used by hikers.

### **6.2 GENERAL DESCRIPTION OF STRUCTURES**

No structures were observed at the site.

### **6.3 USE, STORAGE, AND DISPOSAL OF PETROLEUM PRODUCTS AND HAZARDOUS MATERIALS**

No evidence of petroleum products or hazardous materials was observed during the site reconnaissance.

### **6.4 OTHER SUBJECT SITE OBSERVATIONS**

The table below summarizes items that were observed and/or reported at the subject site during the site visit other than those items related to use, storage, and disposal of petroleum or hazardous

materials (described in Section 6.3 above). If items were observed or reported, they are further described either in the table or below.

Description	Observed or Reported at Time of Site Visit	Observations/Comments
Potable Water Supply	No	
Nearest Drinking Water Source	No	
Sewage Disposal System	No	
Septic System	No	
Unidentified Storage Containers	No	
Wastewater Discharge	No	
Odors	No	
Polychlorinated biphenyls (PCBs) Associated with Electrical or Hydraulic Equipment	No	
Elevators (Traction or Hydraulic)	No	
Vehicle Maintenance Lifts	No	
Emergency Generators	No	
Sprinkler System Pumps	No	
Heating System	No	
Cooling System	No	
Stains or Corrosion on Floors, Walls, or Ceilings	No	
Floor Drains	No	
Sumps	No	
Catch Basins	No	
Pits, Ponds, Lagoons, and Pools of Liquid	No	
Stained Soil or Pavement	No	
Stressed Vegetation	No	
Solid Waste and Evidence of Waste Filling	No	
Dry Wells	No	
Monitoring Wells	No	
Water Supply Wells	No	
Irrigation Wells	No	
Injection Wells	No	
Abandoned Wells	No	

## 6.5 ADJOINING PROPERTY OBSERVATIONS

The subject site is surrounded by residential developments, parks, a golf course, and undeveloped land. No conditions of environmental concern were observed on the adjoining properties during the site reconnaissance.

## 6.6 USER RESPONSIBILITIES

The AAI Rule requires that the User of the report consider the following:

- Whether the user has specialized knowledge about previous ownership or uses of the subject site that may be material to identifying RECs;
- Whether the user has determined that the subject site's Title contains environmental liens or other information related to the environmental condition of the property, including engineering and institutional controls and Activity and Use Limitations (AULs), as defined by ASTM;
- Whether the user is aware of commonly known or reasonably ascertainable information about the subject site including whether or not the presence of contamination is likely on the subject site and to what degree it can be detected; and
- Whether the user has prior knowledge that the price of the subject site has been reduced for environmentally related reasons.

While such information is not required to be provided to the environmental professional(s), the information can assist the environmental professional in identifying recognized environmental conditions. The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for a Landowner Liability Protection (LLP) to CERCLA liability.

Haley & Aldrich conducted a phone interview with Mr. Leon Chen on 30 March 2018, to comply with the AAI User Responsibilities. Mr. Chen's responses as summarized below.

- No environmental cleanup liens are known to be filed or recorded against the subject site.
- No activity and land use limitations are known to be in place on the subject site or known to be filed or recorded in a registry.
- Mr. Chen does not have any specialized knowledge or experience related to the subject site or nearby properties.
- Mr. Chen is aware of the subject site's past use as a quarry and knows of no specific chemicals that were present, spilled or otherwise released to the property.
- Mr. Chen is not aware of any obvious indicators that point to the presence or likely presence of contamination on the subject site.

## 7. Findings and Opinions

### 7.1 DATA GAPS

Haley & Aldrich did not identify any significant data gaps during this assessment.

### 7.2 RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-13 Standard defines a REC in part as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property.”

Our opinion regarding a REC's potential impact on the subject site is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intended use for the subject site.

RECs were not identified in connection with the subject site.

### 7.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-13 Standard defines a CREC as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

CRECs were not identified in connection with the subject site.

### 7.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-13 Standard defines an HREC as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

HRECs were not identified in connection with the subject site.

### 7.5 DE MINIMIS CONDITIONS

The ASTM E 1527-13 Standard defines *de minimis* conditions as those conditions which “do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” The ASTM E 1527-13 Standard notes that “conditions determined to be *de minimis* are not recognized environmental conditions.”

*De minimis* conditions were not identified in connection with the subject site.

## **7.6 OTHER ENVIRONMENTAL CONCERNS**

Gravel mining operations occurred on-site in the early to mid 1970s. Drilling or blasting were reportedly not performed at the site. Former mining operations and use of heavy equipment have the potential to have released hazardous materials at the site. If the area of the former gravel mine quarry is planned for future development, the area should be further evaluated for potential historical impacts.

## **8. Conclusions**

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM E 1527-13 Standard of the properties located adjacent to Stevens Creek Park, Linda Vista Park, and Canyon View Drive in Cupertino, California. The subject site is comprised of three parcels with the following APNs: 356-05-007, 356-05-008, and 356-27-026. Any exceptions to or deletions from this practice are described in Section 1.4 of this report.

This Phase I has revealed no evidence of RECs, HRECs or CRECs in connection with the subject site.

## 9. Environmental Professional Certification

The undersigned declare the following:

We declare that, to the best of our professional knowledge and belief, we meet the definition of [Environmental Professional](#) as defined in 40 CFR Part 312, §312.10.

We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject site and “develop opinions and conclusions regarding conditions indicative of releases or threatened releases.” We have developed and performed the “all appropriate inquiries” (AAI) in conformance with the standards and practices set forth in 40 CFR Part 312.

Edison Ticken, P.E.  
Project Manager

Wojciech Bajsarowicz  
Voytek Bajsarowicz  
Senior Associate

## 10. Credentials

This Phase I report was prepared by Edison Ticken under the direct supervision of Voytek Bajsarowicz, who served as the Environmental Professional(s) for this project. Qualification information for the project personnel is provided below.

**Edison Ticken, P.E.**  
**Project Manager**

Mr. Ticken holds a B.S. in Chemical Engineering from UC Santa Barbara and is a California Professional Engineer. Mr. Ticken has over 7 years of environmental consulting experience and has been involved in a wide range of environmental investigation and remediation projects including soil, soil gas, and groundwater cleanup sites.

**Voytek Bajsarowicz**  
**Senior Associate**

Mr. Bajsarowicz is a senior associate with over 25 years in the environmental consulting business managing site assessments, investigations, and remedial events.

## 11. Glossary and Other Descriptions

### 11.1 GLOSSARY

**All Appropriate Inquiry (AAI)** — that inquiry constituting “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined in CERCLA, 42 U.S.C §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

**Business Environmental Risk** — a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

**Controlled Recognized Environmental Condition (CREC)** — a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

**Data Gap** — a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

**De Minimis Conditions** — conditions which do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

**Environmental Professional** — a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b).

**Historical Recognized Environmental Condition (HREC)** — a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

**Key Site Manager** — the person identified by the owner or operator of a property as having good knowledge of the uses and physical characteristics of the property.

**Material Threat** — a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

**Orphan Site** — (not ASTM E 1527-13 definition) — sites that could not be mapped due to poor or inadequate address information.

**Recognized Environmental Condition (REC)** — the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

## 11.2 DESCRIPTIONS OF DATABASES SEARCHED

Numerous regulatory databases were searched during this Phase I. Each database reviewed is described in the database report presented in Appendix C. Those databases required by the ASTM E 1527-13 Standard are identified below.

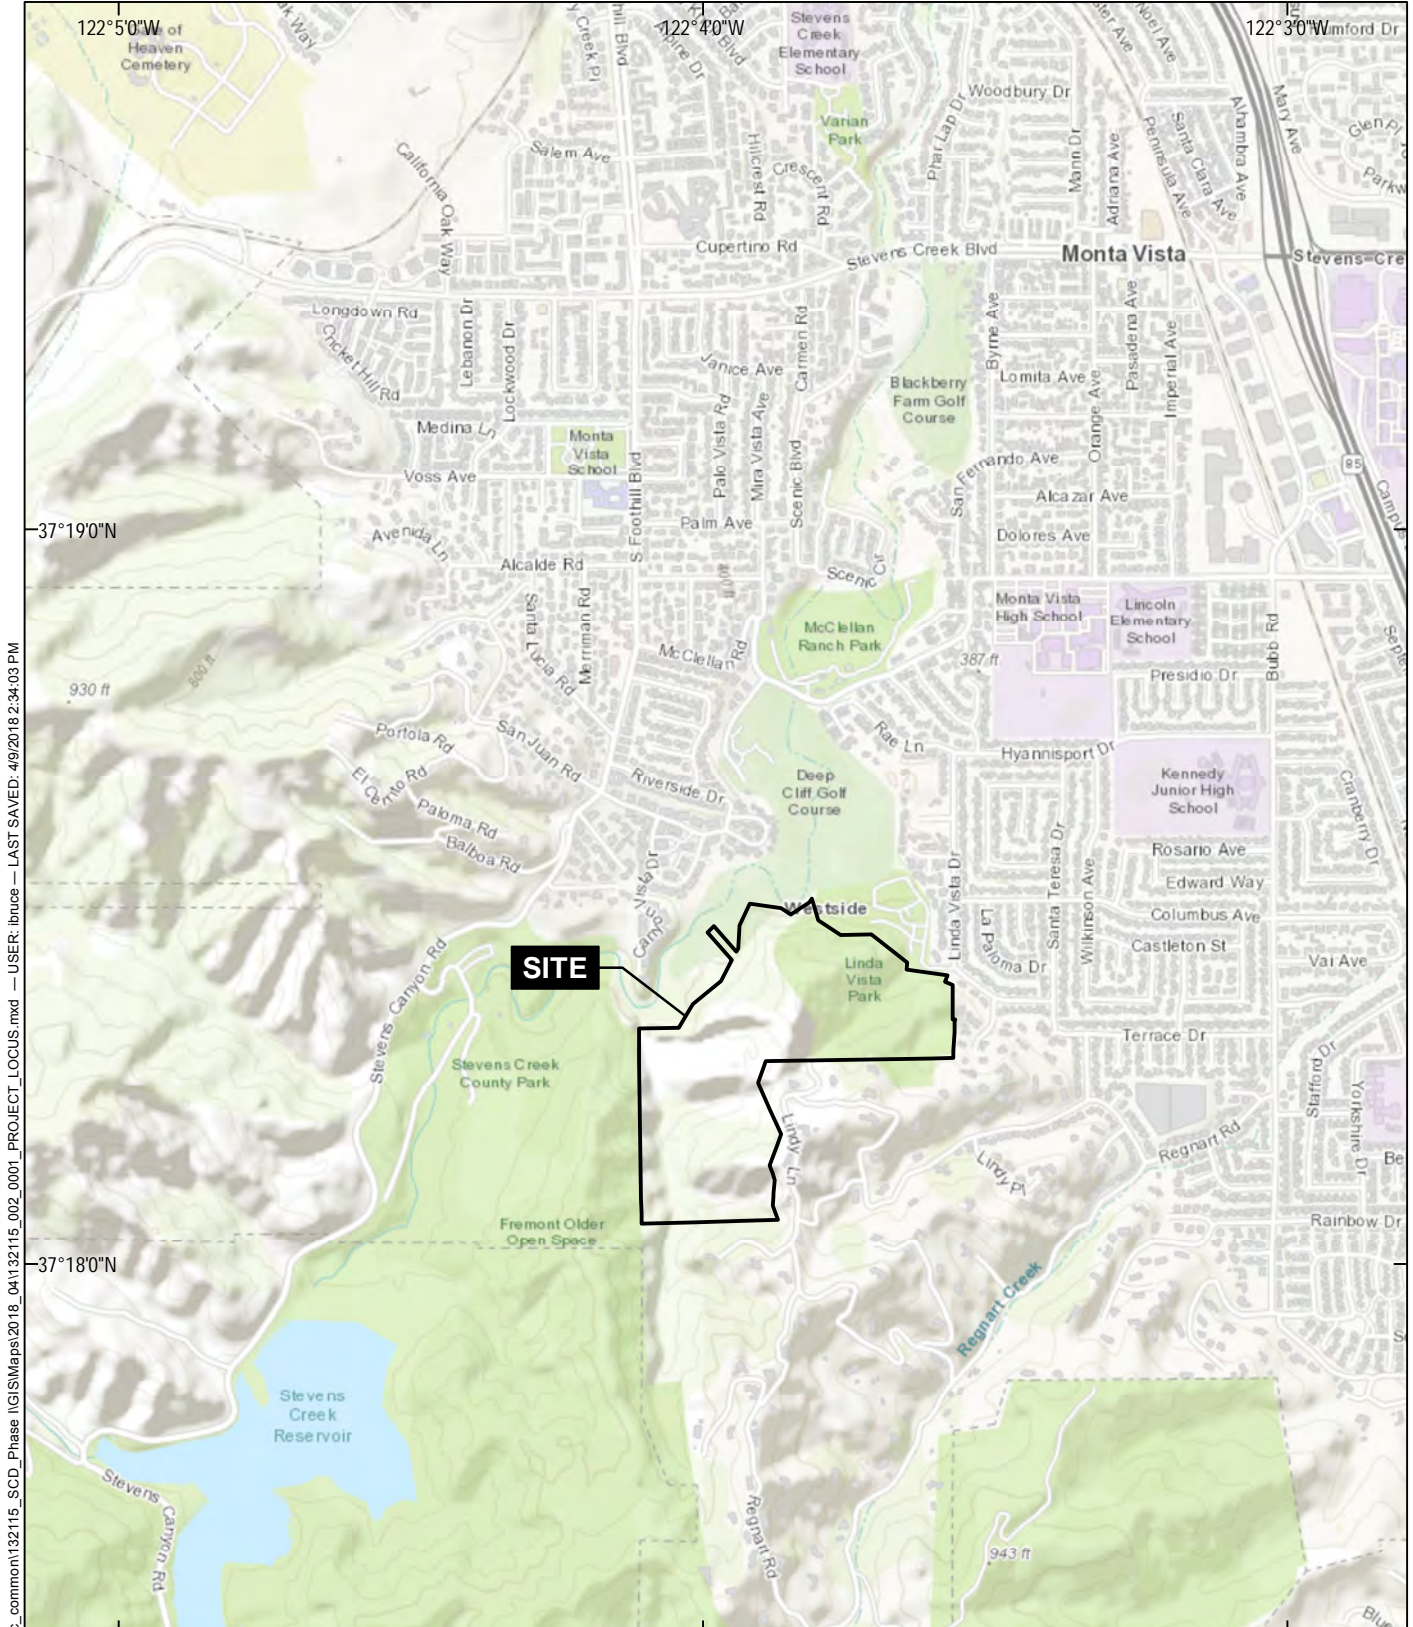

1. **NPL Sites:** The National Priorities List (NPL) is a list of contaminated sites that are considered the highest priority for cleanup by the U.S. Environmental Protection Agency (USEPA).
2. **Delisted NPL Sites:** The Delisted National Priorities List (NPL) is a list of formal NPL sites formerly considered the highest priority for cleanup by the USEPA that met the criteria of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) for deletion from the NPL because a no further response was appropriate.
3. **CERCLIS Sites:** The Comprehensive Environmental Response, Compensation, and Liability Act Information System (CERCLIS) list identifies sites which are suspected to have contamination and require additional investigation to assess whether they should be considered for inclusion on the NPL.
4. **CERCLIS-NFRAP Sites:** CERCLIS-NFRAP status indicates that a site was once on the CERCLIS List but has No Further Response Actions Planned (NFRAP). Sites on the CERCLIS-NFRAP List were removed from the CERCLIS List in February 1995 because, after an initial investigation was performed, no contamination was found, contamination was removed quickly, or the contamination was not significant enough to warrant NPL status.
5. **Federal ERNS:** The Federal Emergency Response Notification System (ERNS) list tracks information on reported releases of oil and hazardous materials.
6. **RCRA non-CORRACTS TSD facilities:** The Resource Conservation and Recovery Act (RCRA) non-CORRACTS TSD Facilities List tracks facilities which treat, store, or dispose of hazardous waste and are not associated with corrective action activity.

7. **RCRA CORRACTS TSD facilities:** The RCRA CORRACTS TSD Facilities list catalogues facilities that treat, store, or dispose of hazardous waste and have been associated with corrective action activity.
8. **RCRA Generators:** The RCRA Generator list is maintained by the USEPA to track facilities that generate hazardous waste.
9. **Federal Institutional Controls/Engineering Controls:** The Federal Institutional Control list and Engineering Control list are maintained by the USEPA. Some Institutional Control and Engineering Control information may not be made publicly available and therefore will not be included on this registry.
10. **State and Tribal Equivalent CERCLIS Sites:** The (ASTM E 1527-13 Standard) requires searching “State and Tribal Equivalent NPL Sites.” In California, the equivalent NPL is the RESPONSE database and the equivalent CERCLIS is the ENVIROSTOR database, which are maintained by the California Department of Toxic Substances Control (DTSC).
11. **State and Tribal Registered Storage Tanks:** In California, local regulatory agencies (e.g., County health departments and fire departments) and the State Water Resources Control Board (SWRCB) maintain lists of aboveground and underground storage tanks registered with those agencies (e.g., County health departments). For tribal property, the USEPA Region 9 maintains a list of underground storage tanks on Indian land.
12. **State and Tribal Landfills and Solid Waste Disposal Sites:** In California, the SWRCB in coordination with the Regional Water Quality Control Boards (RWQCB), and the Integrated Waste Management Board (IWMB) maintain lists of regulated waste disposal sites.
13. **State and Tribal Leaking Storage Tanks:** In California, the SWRCB in coordination with the RWQCBs maintains lists of Leaking Storage Tanks (LUST/LAST). The LUST/LAST lists are a listing of release sites that have an underground or aboveground storage tank listed as the source. For tribal property, the USEPA Region 9 maintains a list of leaking USTs on Indian land.
14. **State and Tribal Institutional Controls/Engineering Controls:** The USEPA maintains lists of sites with Institutional controls or Engineering controls in place. In addition, DTSC maintains a list of environmental deed restrictions.
15. **State and Tribal Voluntary Cleanup Sites:** In California, the DTSC, RWQCBs, and local regulatory agencies (e.g., County health departments) maintain lists of Voluntary Cleanup sites.
16. **State and Tribal Brownfield Sites:** In California, the DTSC maintains a list of Brownfield sites which includes any property where a redevelopment or re-use may be compromised by the presence or presumed presence of hazardous materials or petroleum.

**APPENDIX A**

**Limitations**

**Haley & Aldrich Proposal dated 19 March 2018**

## **APPENDIX A**

### **Haley & Aldrich, Inc. Limitations**

Environmental site assessment (“ESA”) reports prepared by Haley & Aldrich are for the sole and exclusive use of its Client. Haley & Aldrich represents that the ESA was prepared in accordance with the ASTM International Standard E1527-13 entitled “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (“ASTM E 1527-13”). The findings, opinions, conclusions and information contained in the ASTM E 1527-13 ESA are limited to, and solely based upon, information reasonably ascertainable by Haley & Aldrich at the time the ASTM E 1527-13 ESA was completed.

All users of this ASTM E 1527-13 ESA are bound to the terms and conditions and limitations contained in the accompanying Proposal, Terms & Conditions, and Limitations for this ASTM E 1527-13 ESA. The findings, opinions, conclusions and information contained in this report are based solely on the Scope of Services provided pursuant to the Proposal and its attachments and the information reasonably ascertainable by Haley & Aldrich at the time the ASTM E 1527-13 ESA was completed. Haley & Aldrich has not performed any additional observations, investigations, studies, or other testing not specified in the Scope of Services. Haley & Aldrich shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Scope of Services.

This ASTM E 1527-13 ESA is prepared for the exclusive use of Haley & Aldrich’s client in connection with the subject property for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property. There are no intended beneficiaries other than Haley & Aldrich’s client. Haley & Aldrich shall owe no duty whatsoever to any other person or entity by issuing the ASTM E 1527-13 ESA. Use of this ASTM E 1527-13 ESA by any person or entity, including by Haley & Aldrich’s client, for a purpose other than for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property is expressly prohibited unless such person or entity obtains written authorization from Haley & Aldrich indicating that the ASTM E 1527-13 ESA is adequate for such other use. Use of this ASTM E 1527-13 ESA by any person or entity for such other purpose without written authorization by Haley & Aldrich shall be at such person’s or entity’s sole risk and shall be without legal exposure or liability to Haley & Aldrich.

Haley & Aldrich may authorize third-party reliance on the ASTM E 1527-13 ESA by providing reliance letters to third party(ies) provided that the third party(ies) agree: (1) to use the ASTM E 1527-13 ESA only for the purpose of assessing the potential or existing environmental contamination liabilities associated with real property; (2) to be bound by the terms and conditions and limitations contained in the ASTM E 1527-13 ESA and the Proposal and its attachments, Terms & Conditions, and Limitations; (3) to accept the form and substance of Haley & Aldrich’s reliance letter; and (4) to deliver to Haley & Aldrich a signed copy of a reliance letter by an authorized representative of the relying party, within thirty (30) days after said reliance letter is provided to the relying party, signifying the relying party’s acceptance of the aforementioned conditions. Upon Haley & Aldrich’s receipt of the signed reliance letter by the relying party(ies), the relying party(ies) will be authorized to rely on Haley & Aldrich’s ASTM E 1527-13 ESA for the limited purpose of identifying potential or existing environmental contamination liabilities associated with the subject property. The relying party(ies) agrees to bind each of its respective successors and assigns to the aforementioned terms and conditions.

This ASTM E 1527-13 ESA reflects site conditions observed and described by records available to Haley & Aldrich as of the date of ASTM E 1527-13 ESA preparation. The passage of time may result in significant changes in site conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the ASTM E 1527-13 ESA. Accordingly, Haley & Aldrich's client and any other party to whom the ASTM E 1527-13 ESA is provided recognize and agree that Haley & Aldrich shall bear no liability for deviations from observed conditions or available records after the time of ASTM E 1527-13 ESA preparation. Haley & Aldrich makes no express or implied representation that the information contained in the ASTM E 1527-13 ESA has continued viability after 180 days of the ASTM E 1527-13 ESA's completion date, and any use or reliance on the ASTM E 1527-13 ESA after 180 days of the ASTM E 1527-13 ESA's completion date by Haley & Aldrich's client or any other authorized person or entity will be at that party's sole risk and without liability to Haley & Aldrich.

Notwithstanding anything contained herein, Haley & Aldrich shall not be liable for any claim or damage arising from environmental contamination liabilities that occurred on the subject property after the effective date of the ASTM E 1527-13 ESA. Likewise, Haley & Aldrich shall not be liable for any existing or future property owner's failure to satisfy any continuing obligation for CERCLA liability protection or under the Federal Environmental Protection Agency's All Appropriate Inquiries rule.

SC Design Group  
20370 Town Center Lane, #139  
Cupertino, California 95014

Attention: Susan Chen

Subject: Proposal for ASTM Phase I Environmental Site Assessment  
Linda Vista Subdivision  
Cupertino, California

Ladies and Gentlemen:

Haley & Aldrich, Inc. (Haley & Aldrich) is pleased to submit this proposal to provide environmental due diligence consulting services in support of the development of the Linda Vista Subdivision property located on Stevens Canyon Road adjacent to Stevens Creek County Park in Cupertino, California (subject site).

## **Project Understanding and Background**

SC Design Group has requested a proposal in support of the future plans to develop the property. In connection with this proposed transaction, you desire a Phase I Environmental Site Assessment<sup>1</sup> in order to identify potential environmental implications to your plans.

The site is an approximately 87-acre parcel of undeveloped land in the City of Cupertino, Santa Clara County, California.

## **Scope and Costs**

Haley & Aldrich's scope of services and associated costs are summarized in the table below.

---

<sup>1</sup> The ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13 Standard) as referenced in 40 CFR Part 312 (the All Appropriate Inquiries [AAI] Rule).

Scope Item	Description	Type	Cost
1. Phase I Environmental Site Assessment	Completion of an ASTM E 1527-13 Standard Phase I Environmental Site Assessment per the attached work scope (Attachment I). <sup>1,2,3</sup>	Lump Sum	████████
<b>TOTAL:</b>			████████

*Notes & Assumptions:*

1. The scope of work includes a 1-hour meeting or conference call. Time spent conducting additional meetings/conference calls will be billed separately pending client authorization.
2. The scope of work does not include time for reviewing lengthy reports and regulatory files. Time spent reviewing numerous or lengthy reports and regulatory files will be billed separately pending client authorization.
3. This scope of work assumes one site visit conducted during regular business hours. Site access will be coordinated by the client.

### Third Party Reliance

The Phase I Environmental Site Assessment report prepared by Haley & Aldrich is for the sole and exclusive use of SC Design Group. In the event SC Design Group’s lenders and each of their respective successors and assigns (Relying Parties) desire to rely on Haley & Aldrich’s Phase I Environmental Site Assessment report, such Relying Parties must obtain Haley & Aldrich’s prior written authorization and execute Haley & Aldrich’s Reliance Letter.

### User Responsibilities

A user seeking protection from Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability as an innocent landowner, bona fide prospective purchaser, or contiguous property owner must complete all components of the All Appropriate Inquiries (AAI) process in addition to meeting ongoing obligations. These user responsibilities are further described in Attachment I and in the User Responsibilities Questionnaire in Attachment II.

**We request that you provide the information in the questionnaire to us.** Though it is not required by the AAI Rule or the ASTM E 1527-13 Standard that this information be provided to Haley & Aldrich, failure on the part of the user to obtain such information for their own records, should it be reasonably ascertainable, may invalidate the user’s compliance with the AAI Rule for CERCLA liability protection in the future.

To meet the requirements of 40 CFR 312, a search for the existence of environmental liens, deed restrictions, engineering/institutional controls, activity and use limitations (AUL), etc., that are filed or recorded against the subject site must be conducted by the user. The scope of work included in Attachment I includes a search of those records as part of the database search, with the exception of a lien search. We understand that as part of your due diligence you will either engage a title company, real estate attorney, or title professional to undertake a review of reasonably ascertainable recorded records for environmental liens deed restrictions, engineering/institutional controls, AULs, etc.,

currently recorded against or relating to the subject site. If you would instead like us to include a lien search as part of our assessment, this can be conducted at additional cost.

## Schedule

We will provide a draft copy of our Phase I Environmental Site Assessment report for your review within 4 weeks of receipt of a signed copy of this proposal. We will update you on our findings as our work progresses.

Please note that responses to agency records requests may not be received within the above timeframe. We will supplement the report with the responses if they are received and contain information that would alter our conclusions.

## Authorization

Consulting services will be provided in accordance with our "Standard Terms and Conditions" dated 2013 and the Limitations in Attachment III, which are integral to this proposal.

If the above arrangements are satisfactory to you, please indicate your approval by signing and returning one copy of this letter. When accepted by you, this proposal together with the attached Terms and Conditions and Limitations (Attachment III) will constitute our Agreement.

## Closing

Thank you for inviting Haley & Aldrich to submit this proposal. We look forward to our association with you on the project. Should you have any questions regarding the proposal, please do not hesitate to contact us.

Sincerely yours,  
HALEY & ALDRICH, INC.

  
Wojciech Bajzarowicz  
Senior Associate

This proposal, and the attached "Standard Terms and Conditions, 2013" are understood and accepted:

## Attachment I

### ASTM E 1527-13 Phase I Environmental Site Assessment Standard Scope of Services & User Responsibilities

#### Scope of Services

The scope of services below summarizes Haley & Aldrich, Inc.'s proposed environmental professional services required to complete an environmental site assessment and "All Appropriate Inquiry" (AAI) for a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601), in accordance with 40 CFR Part 312.20 (All Appropriate Inquiries), to permit a user to satisfy one of the requirements to qualify for CERCLA's innocent landowner defense, contiguous property owner liability protection, or bona fide prospective purchaser liability protection (landowner liability protections or LLP).

Title 40, Part 312.11 of the Code of Federal Regulations provides that the procedures of ASTM International Standard E 1527-13 entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM E 1527-13) may be used to comply with the requirements of 40 CFR 312, AAI.

The goal of ASTM E 1527-13 is to assess whether recognized environmental conditions (REC) exist at the subject site. REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

Accordingly, the five core components of Haley & Aldrich's standard scope of services, performed in accordance with ASTM E 1527-13, shall include:

1. Records Review – In accordance with ASTM E 1527-13, Haley & Aldrich will obtain and review reasonably ascertainable records that will help identify RECs in connection with the subject site.
2. Site Reconnaissance - Haley & Aldrich will visit the subject site to obtain information indicating the likelihood of identifying RECs in connection with the subject site. On the visit to the subject site, Haley & Aldrich will visually observe and document the subject site and the periphery of any structure(s) located on the subject site to the extent our view of the same is not obstructed. Additionally, Haley & Aldrich shall visually observe and document accessible components of the interior of any building located on the subject site. Conditions of adjoining properties will also be observed and documented from the subject site boundaries and/or public thoroughfares.
3. Interviews with Owners and Occupants - ASTM E 1527-13 requires that interviews be performed with a "key site manager" (a person with good knowledge of uses and physical characteristics of the subject site), as well as, past and present owners, operators, and occupants of the subject

site to obtain information indicating RECs in connection with the subject site. Please provide contact information for the “key site manager” so Haley & Aldrich can arrange a mutually convenient appointment to interview the key site manager. We also ask that you advise all known past and present owners, operators, and occupants of our site visit so we may interview a number of them as required by ASTM E 1527-13. Lastly, in accordance with standard ASTM E 1527-13, we request that you arrange to have assembled and available to Haley & Aldrich, on the day of our subject site visit, or as soon as possible, copies of any previous environmental documents (user-provided information), including: environmental site assessment reports, environmental compliance audit reports, environmental permits, registrations for underground and above-ground storage tanks, registrations for injection systems, material data safety sheets, community right-to-know plan, safety plans, spill prevention plans, emergency preparedness plans, hydrogeologic reports for the subject site, any government notices concerning the subject site, hazardous waste records and reports, geotechnical studies, risk assessments, recorded Activity and Use Limitations (AUL), environmental land use restrictions (ELUR), or environmental liens.

4. Interviews with State and/or Local Government Officials – Haley & Aldrich shall reasonably attempt to interview applicable state and/or local government officials to obtain information indicating RECs in connection with the subject site.
5. Evaluation and Report - Haley & Aldrich will interpret the information and data assembled from work scope items No. 1 through No. 4 above, and will formulate conclusions regarding evidence of RECs at the subject site and their potential impact on the subject site. We will prepare a report in accordance with the format set forth in ASTM E 1527-13 unless otherwise directed. The report will generally include a summary, introduction, site description, records, site and interview documentation, supporting documents, findings, conclusions, recommendations, and appropriate professional statements as required by ASTM E 1527-13.

## **User Responsibilities**

A user seeking protection from CERCLA liability as an innocent landowner, bona fide prospective purchaser, or contiguous property owner must complete all components of the AAI process in addition to meeting ongoing obligations. AAI components, CERCLA liability relief, and ongoing obligations are discussed in the AAI Rule and in Appendix XI of the ASTM E 1527-13 Standard.

The AAI Rule requires that the user of the report consider the following:

- Whether the user has specialized knowledge about previous ownership or uses of the subject site that may be material to identifying RECs;
- whether the user has determined that the subject site’s Title contains environmental liens or other information related to the environmental condition of the subject site, including engineering and institutional controls and AULs, as defined by ASTM;
- whether the user is aware of commonly known or reasonably ascertainable information about the subject site including whether or not the presence of contamination is likely on the subject site and to what degree it can be detected; and

- whether the user has prior knowledge that the price of the subject site has been reduced for environmentally related reasons.

We request that you provide this information to us. A copy of the User Responsibility Questionnaire is included in Attachment II. Though it is not required by the AAI Rule or the ASTM E 1527-13 Standard that this information be provided to Haley & Aldrich, failure on the part of the user to obtain such information for their own records, should it be reasonably ascertainable, may invalidate the user's compliance with the AAI Rule for CERCLA liability protection in the future.

## Attachment II

### User Responsibilities Questionnaire All Appropriate Inquiries Under ASTM E1527-13

Date:

Subject Site Name:

Address:

Prepared By:

In order to qualify for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct "All Appropriate Inquiry" (AAI), which includes consideration of the following information (if available). Though it is not required that this information be provided to the environmental professional for the completion of the ASTM E1527-13 Phase I Environmental Site Assessment, failure of the user to consider this information could result in a determination that AAI is not complete.

- (1.) Environmental cleanup liens that are filed or recorded against the subject site (40 CFR 312.25).**  
Are you aware of any environmental cleanup laws against the subject site that are filed or recorded under federal, tribal, state, or local law? If yes, give a description and attach copies of the liens.
  
- (2.) Activity and land use limitations that are in place on the subject site or that have been filed or recorded in a registry (40 CFR 312.26).**  
Are you aware of any Activity and Use Limitations (AUL), such as engineering controls, land use restrictions or institutional controls that are in place at the subject site or have been filed or recorded in a registry under federal, tribal, state, or local law?
  
- (3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**  
As the user of this Phase I Environmental Site Assessment do you have any specialized knowledge or experience related to the subject site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
  
- (4.) Relationship of the purchase price to the fair market value of the subject site if it were not contaminated (40 CFR 312.29).**  
Does the purchase price being paid for this subject site reasonably reflect the market value of the subject site? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject site?

**(5.) Commonly known or reasonably ascertainable information about the subject site (40 CFR 312.30).**

Are you aware of commonly known, or reasonably ascertainable information about the subject site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- (a.) Do you know the past uses of the subject site?
- (b.) Do you know the specific chemicals that are present or once were present at the subject site?
- (c.) Do you know of spills or other chemical releases that have taken place at the subject site?
- (d.) Do you know of any environmental cleanups that have taken place at the subject site?

**(6.) The degree of obviousness of the presence or likely presence of contamination at the subject site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the user of this Phase I Environmental Site Assessment, based on your knowledge and experience related to the subject site are there any obvious indicators that point to the presence or likely presence of contamination at the subject site?

## Attachment III

### **Haley & Aldrich, Inc. Limitations**

Environmental site assessment (Phase I Environmental Site Assessment) reports prepared by Haley & Aldrich are for the sole and exclusive use of its Client. Haley & Aldrich represents that the Phase I Environmental Site Assessment was prepared in accordance with the ASTM International Standard E1527-13 entitled “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM E 1527-13). The findings, opinions, conclusions, and information contained in the ASTM E 1527-13 Phase I Environmental Site Assessment are limited to, and solely based upon, information reasonably ascertainable by Haley & Aldrich at the time the ASTM E1527-13 Phase I Environmental Site Assessment was completed.

All users of this ASTM E 1527-13 Phase I Environmental Site Assessment are bound to the terms and conditions and limitations contained in the accompanying Proposal, Terms and Conditions, and Limitations for this ASTM E 1527-13 Phase I Environmental Site Assessment. The findings, opinions, conclusions, and information contained in this report are based solely on the Scope of Services provided pursuant to the Proposal and its attachments and the information reasonably ascertainable by Haley & Aldrich at the time the ASTM E 1527-13 Phase I Environmental Site Assessment was completed. Haley & Aldrich has not performed any additional observations, investigations, studies, or other testing not specified in the Scope of Services. Haley & Aldrich shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Scope of Services.

This ASTM E 1527-13 Phase I Environmental Site Assessment is prepared for the exclusive use of Haley & Aldrich’s client in connection with the subject site for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject site. There are no intended beneficiaries other than Haley & Aldrich’s client. Haley & Aldrich shall owe no duty whatsoever to any other person or entity by issuing the ASTM E 1527-13 Phase I Environmental Site Assessment. Use of this ASTM E 1527-13 Phase I Environmental Site Assessment by any person or entity, including by Haley & Aldrich’s client, for a purpose other than for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject site is expressly prohibited unless such person or entity obtains written authorization from Haley & Aldrich indicating that the ASTM E 1527-13 Phase I Environmental Site Assessment is adequate for such other use. Use of this ASTM E 1527-13 Phase I Environmental Site Assessment by any person or entity for such other purpose without written authorization by Haley & Aldrich shall be at such person’s or entity’s sole risk and shall be without legal exposure or liability to Haley & Aldrich.

Haley & Aldrich may authorize third-party reliance on the ASTM E 1527-13 Phase I Environmental Site Assessment by providing reliance letters to third party(ies) provided that the third party(ies) agree: (1) to use the ASTM E 1527-13 Phase I Environmental Site Assessment only for the purpose of assessing the potential or existing environmental contamination liabilities associated with real property; (2) to be bound by the terms and conditions and limitations contained in the ASTM E1527-13 Phase I Environmental Site Assessment report and the proposal and its Attachments, Terms and Conditions, and Limitations; (3) to accept the form and substance of Haley & Aldrich’s reliance letter; and (4) to deliver to Haley & Aldrich a signed copy of a reliance letter by an authorized representative of the relying party, within thirty (30) days after said reliance letter is provided to the relying party, signifying the relying party’s acceptance of the aforementioned conditions. Upon Haley & Aldrich’s receipt of the signed

reliance letter by the relying party(ies), the relying party(ies) will be authorized to rely on Haley & Aldrich's ASTM E1527-13 Phase I Environmental Site Assessment for the limited purpose of identifying potential or existing environmental contamination liabilities associated with the subject site. The relying party(ies) agree(s) to bind each of its respective successors and assigns to the aforementioned Terms and Conditions.

This ASTM E 1527-13 Phase I Environmental Site Assessment reflects site conditions observed and described by records available to Haley & Aldrich as of the date of ASTM E 1527-13 Phase I Environmental Site Assessment preparation. The passage of time may result in significant changes in site conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the ASTM E 1527-13 Phase I Environmental Site Assessment. Accordingly, Haley & Aldrich's client and any other party to whom the ASTM E 1527-13 Phase I Environmental Site Assessment is provided recognize and agree that Haley & Aldrich shall bear no liability for deviations from observed conditions or available records after the time of ASTM E 1527-13 Phase I Environmental Site Assessment preparation. Haley & Aldrich makes no express or implied representation that the information contained in the ASTM E 1527-13 Phase I Environmental Site Assessment has continued viability after 180 days of the ASTM E 1527-13 Phase I Environmental Site Assessment's completion date, and any use or reliance on the ASTM E 1527-13 Phase I Environmental Site Assessment after 180 days of the ASTM E 1527-13 Phase I Environmental Site Assessment's completion date by Haley & Aldrich's client or any other authorized person or entity will be at that party's sole risk and without liability to Haley & Aldrich.

Notwithstanding anything contained herein, Haley & Aldrich shall not be liable for any claim or damage arising from environmental contamination liabilities that occurred on the subject site after the effective date of the ASTM E 1527-13 Phase I Environmental Site Assessment. Likewise, Haley & Aldrich shall not be liable for any existing or future property owner's failure to satisfy any continuing obligation for CERCLA liability protection or under the Federal Environmental Protection Agency's All Appropriate Inquiries rule.

**PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE**  
**McDONALD DORSA PROPERTY**  
**CUPERTINO, CALIFORNIA**  
**FOR: PH PROPERTY DEVELOPMENT COMPANY**

---

**EXECUTIVE SUMMARY**

Dames & Moore has completed a Phase I Environmental Site Assessment Update (ESAU) for an approximately 130-acre parcel of undeveloped land located in the City of Cupertino, Santa Clara County, California. Dames & Moore had initially performed a Phase I Environmental Site Assessment of the subject property in December 1995. Anecdotal information received from neighbors in late 1996 indicated that a landfill might have existed on the property during the 1960s and 1970s. Several investigations were then conducted and the former landfill was remediated by the City of Cupertino in 1998/1999.

This ESAU was accomplished by, and limited to, a site reconnaissance, a review of federal, state, and local agency lists, and contacts with governmental agencies.

A brief summary of Dames & Moore's findings regarding potential environmental concerns at the subject property is presented below.

Dames & Moore representatives visited the subject property on September 17, 1999. Staining or odors were not noted on the site; however, the area was heavily wooded or covered in many areas with dense vegetation. The soil surface was not visible in many areas. Hazardous materials, hazardous waste, aboveground fuel storage tanks or evidence of underground storage tanks, drums, containers, PCB-containing equipment, sumps, drains, ponds or lagoons were not observed onsite during the site reconnaissance.

The subject property was not identified on the VISTA database. Offsite agency-identified facilities located in adjacent or upgradient positions were not found. Site files were not found according to local regulatory agencies contacted. The remediation of the former landfill has been completed as documented in the September 8, 1999 CDM Final Removal Action Report that was submitted to the Santa Clara County Department of Environmental Health. The County has not yet sent a letter confirming concurrence that no further action is required for the site.

Based on scope of services performed for this ESAU, Dames & Moore does not recommend further investigation of the subject property at this time.

## 1.0 INTRODUCTION

This report presents the results of Dames & Moore's Phase I Environmental Site Assessment Update (ESAU) conducted for an approximately 130 acre parcel of undeveloped land located in City of Cupertino, Santa Clara County, California (Figure 1). Dames & Moore performed the original Phase I Environmental Site Assessment (ESA) in December 1995 (Dames & Moore, 1995). Anecdotal information obtained from neighbors in late 1996 indicated that an approximately one acre portion of the property formerly operated as an unregistered landfill. Several investigations have occurred in this area and remediation of the former landfill was accomplished by the City of Cupertino in 1998/1999, as described in Section 3.2 of this report.

## 2.0 PURPOSE AND SCOPE OF SERVICES

The purpose of this ESAU is to update current features, activities, facilities, and conditions at the subject property to evaluate the potential presence of hazardous substances and the potential impact such substances may have on soil and groundwater quality at the site. To meet this objective, Dames & Moore completed the following tasks:

- Performed a reconnaissance survey of the subject property to make visual observations of existing site conditions and activities, and performed a drive-by survey of the area within a ¼ mile radius of the site to observe types of general land use within the search area;
- Reviewed a computer database report of available federal, state, and local agency lists of known or potential hazardous waste sites or landfills and sites currently under investigation for environmental violations in the vicinity of the subject property; this report was prepared by VISTA Information Solutions, Inc. under subcontract to Dames & Moore;
- Conducted inquiries by telephone or in writing to the following regulatory agencies for information regarding environmental permits, violations or incidents, and/or status of enforcement actions at the subject property and surrounding properties:
  - Santa Clara County Department of Environmental Health (SCCDEH) and
  - Santa Clara Valley Water District (SCVWD).
- Prepared this report describing the research performed and presenting Dames & Moore's findings and professional opinions regarding the potential for environmental contamination at the subject site.

Based on the scope of services outlined in this proposal, this ESAU specifically did not include evaluation for the presence of asbestos, wetlands, testing for radon gas, lead-based paint, or lead in drinking water at the subject property.

### **3.0 SITE RECONNAISSANCE**

Dames & Moore representatives visited the subject property on September 17, 1999, between the hours of 9:00 and 11:00 a.m. Weather conditions at the time of the visit were partly cloudy, with a temperature of approximately 75 degrees Fahrenheit. Our site visit included a walk-through reconnaissance of the subject property.

#### **3.1 CURRENT USES OF THE PROPERTY**

The subject property consists of four parcels of undeveloped land totaling approximately 130 acres and traversed by Stevens Creek, which flows northeasterly across the property. Staining or odors were not noted on the site; however, the area was heavily wooded or covered in many areas with dense vegetation. The soil surface was not visible in many areas.

The primary entrance to the subject property is a former haul road off Stevens Canyon Road near its intersection with Ricardo Road. This road is paved, although in poor condition, and extends to a former crossing of Stevens Creek. The bridge formerly crossing the creek has been removed. An approximately one acre portion of the property near Stevens Canyon Road, a former unregistered landfill, was remediated by the City of Cupertino in 1999, as described in Section 3.2. The recent grading activities have resulted in a level topography in this area. Hydroseeding was recently completed by the grading contractor.

Much of the property to the south of Stevens Creek is covered with dense brush, although there are trails used by bikers and hikers through the brush. The former haul road continues south across the creek (although the former bridge across the creek no longer exists) to a former gravel mine and mining pit. The cut slopes of the former gravel pit were not flattened after mining operations ceased, and they are very steep in places, greater than 1:1 (horizontal:vertical). The mined area is covered with vegetation, primarily grasses and scrub shrubs. However, erosion on the slopes of the mined area is severe in places, and gullies have formed in the pit floor. Trails used by hikers and bikers cross the floor of the former gravel pit.

Overlooking the mined area are hills to the east and west. The aerial photographs reviewed as part of the original Phase I ESA show access roads for the mining had been made on these hills, but the roads are mostly overgrown. The hill east of the pit has only hiking trails on it, and is relatively underdeveloped. The hill west of the mined area /has an access road for the Pacific

Gas and Electric Company transmission lines which cross the southwest corner of the property. This is a dirt road which is maintained. There are also hiking and biking trails on this hill. The valley to the southwest of the mined area is undeveloped.

Physical evidence of USTs, ASTs or wells was not observed on the subject property.

### **3.2 PAST USES OF THE PROPERTY**

As indicated in Dames & Moore's 1995 ESA, the parcel has been primarily undeveloped, although gravel mining operations occurred onsite in the early to mid 1970s. According to personnel associated with past mining operations, no drilling or blasting was performed in conjunction with gravel extraction. Horse stables were reportedly located onsite in the late 1980s until they were removed due to neighborhood complaints regarding the prevalence of flies.

During the fall of 1996, anecdotal information received from neighbors indicated that a small portion of the property operated as an unregistered landfill during the 1960s and 1970s. To determine if this information was accurate, PH Property Development Company contracted with Dames & Moore to conduct an investigation in an attempt to identify the existence of a former landfill. A geophysical investigation consisting of a magnetometer survey, electric resistivity survey and seismic refraction profiling was conducted by a subcontractor to Dames & Moore (JR Associates, 1997). The results of this investigation revealed that an approximately one acre portion of the property, near the intersection of Stevens Canyon Road and Ricardo Road, had formerly functioned as an unregistered landfill.

The City of Cupertino took lead responsibility for cleaning up and remediating the former landfill, and conducted a series of investigations to characterize its contents as well as its lateral and vertical extent. The City subsequently developed and implemented a Removal Action Workplan that involved excavation and off-site disposal of landfill materials as well as environmental sampling and analysis to demonstrate completion of remedial activities. The work was conducted in accordance with the Environmental Cleanup Agreement between the City and the Owner dated September 26, 1997. These activities are summarized in two reports prepared by Camp, Dresser, and McKee Inc. (CDM), consultants to the City (CDM, 1998, 1999).

Upon completion of site remediation, a Site Restoration Plan was developed by Brian Kangas Foulk, Consulting Engineers (BKF) on behalf of the Owner. Dames & Moore (D&M) has provided environmental and geotechnical consulting services to the Owner during the entire remediation and restoration process.

Our report presenting the results of our observations and investigations relative to environmental and geotechnical issues associated with restoration activities is submitted under separate cover (Dames & Moore, 1999).

### **3.3 EXTERIOR AND INTERIOR SITE OBSERVATIONS**

Buildings were not observed onsite.

### **3.4 HAZARDOUS MATERIALS**

Hazardous materials were not observed onsite.

#### **3.4.1 Hazardous Waste**

Hazardous wastes or activities generating hazardous wastes were not observed onsite.

#### **3.4.2 Underground/Aboveground Storage Tanks**

Aboveground storage tanks (ASTs) or evidence of underground storage tanks (USTs) (e.g., vent pipes, fill ports, or patched concrete or asphalt) were not observed onsite.

#### **3.4.3 Drums and Containers**

Drums or containers were not observed onsite.

#### **3.4.4 PCB-Containing Equipment**

Electrical transformers, hydraulic equipment or other devices potential containing polychlorinated biphenyls (PCBs) were not observed onsite.

#### **3.4.5 Solid Waste**

Solid waste is not generated onsite.

#### **3.4.6 Drains and Sumps**

A subdrain system has been installed as part of site restoration activities, described in the Site Restoration Report (Dames & Moore, 1999). Rainwater runoff is transported through the drainage system to Stevens Creek. Evidence of hazardous material disposal in or around the drains were not observed. Sumps were not observed on the subject property.

### **3.4.7 Wells**

No evidence of wells were observed on the subject property; however, records of the Santa Clara Valley Water District (SCVWD) indicate that one well formerly existed on the south side of Stevens Creek, near the western property line. This well was reportedly destroyed.

### **3.4.8 Pits, Ponds, and Lagoons**

Former gravel mining activities occurred in the early to mid-1970s as described in Sections 3.1 and 3.2. Evidence of drilling, blasting or chemical use were not observed onsite. No ponds or lagoons were observed on the subject property; however, a small earthen embankment is located along a ravine in the southeastern portion of the property.

## **3.5 ADJOINING AND SURROUNDING PROPERTIES**

Residential development has occurred to the north, east and southeast of the site. There are also a golf course and city park which are adjacent to the northeast boundary of the subject property. Southwest of the site is undeveloped land that is part of the Mid-Peninsula Regional Open Space system. Along the west and northwest boundary of the site is Santa Clara County Park. This park has been developed to provide recreational access, parking, picnic and bathroom facilities.

## **4.0 REGULATORY REVIEW**

Dames & Moore reviewed available records regarding past and current site use, and contacted agencies which might have information regarding environmental aspects of the site and surrounding properties. The information obtained through the review of agency lists and agency contacts is provided in the following subsections.

### **4.1 AGENCY LISTS**

Dames & Moore reviewed information gathered from several environmental databases through VISTA Information Solutions Inc. (VISTA) to evaluate whether activities on or near the subject property have the potential to impact environmental conditions at the subject property. VISTA reviews databases compiled by federal, state, and local governmental agencies. The complete list of reviewed databases is provided in the VISTA report, included in Appendix A, and is summarized in Table 1. It should be noted that this information is reported as Dames & Moore received it from VISTA, which in turn reports information as it is provided in various government databases. Although the VISTA information cannot be verified, the use of and reliance on this information is a generally accepted practice in the

conduct of environmental due diligence studies. The databases searched and the information obtained are summarized below. Properties interpreted as hydraulically downgradient or cross-gradient that in our opinion are unlikely to impact the site are excluded from the following discussion.

**TABLE 1**

<b>ENVIRONMENTAL AGENCY DATA</b>	
<b>Agency Database</b>	<b>Survey Distance</b>
United States Environmental Protection Agency (EPA) National Priority List (NPL) for Superfund Sites	1.0 mile
U.S. EPA Resource Conservation and Recovery Act (RCRA) Corrective Action (CORRACTS) List and associated	1.0 mile

California Underground Storage Tanks (UST) List	0.25 mile
South Bay Toxic Sites List	0.5 mile

#### **4.1.1 Subject Property**

The subject property was not identified on the databases reviewed.

#### **4.1.2 Surrounding Properties**

Offsite facilities in adjacent or upgradient positions with potential to impact the site were not identified on the VISTA database.

### **4.2 REGULATORY AGENCY CONTACTS**

During the performance of an ESAU, regulatory agencies having jurisdiction over the subject property are contacted to obtain the following information: the status of relevant environmental permits; whether there have been any notices of violations or other similar correspondence from such agencies; whether any corrective action or remediation is planned, currently taking place, or has been completed at the subject property; whether there have been any reported violations or complaints that the subject property is not in compliance with environmental laws, regulations, or standards, and whether the subject property is under investigation for such non-compliance; whether the subject property is listed on available regulatory databases; and whether there is other pertinent documentation on file with such regulatory agencies regarding the subject property or surrounding sites of concern. Regulatory agencies contacted and a summary of the information obtained from these agencies are discussed below.

On October 6, 1999, Dames & Moore contacted **SCCDEH** by phone requesting that a file search be performed on the subject property. Ms. Tina Bolton of SCCDEH responded that files were not found for the site. In light of the response by Ms. Bolton, it is important to note that Mr. Mohammed Janjua of SCCDEH has been the City/CDM agency contact regarding SCCDEH oversight of landfill remediation activities. CDM has sent to Mr. Janjua letters, reports, work plans, and data concerning the landfill remediation project and Mr. Janjua has approved the work plans and the work conducted by CDM on behalf of the City.

On October 6, 1999, Dames & Moore contacted **SCVWD** by phone requesting that a file search be performed on the subject property. Ms. Chris Tulloch of SCVWD responded that files were not found for the site.

## **5.0 CONCLUSIONS AND RECOMMENDATIONS**

Dames & Moore representatives visited the subject property on September 17, 1999. Staining or odors were not noted on the site; however, the area was heavily wooded or covered in many areas with dense vegetation. The soil surface was not visible in many areas. Hazardous

materials, hazardous waste, aboveground fuel storage tanks or evidence of underground storage tanks, drums, containers, PCB-containing equipment, sumps, drains, ponds or lagoons were not observed onsite during the site reconnaissance.

The subject property was not identified on the VISTA database. Offsite agency-identified facilities located in adjacent or upgradient positions were not found. In response to telephone inquiries, agency officials reported that they did not find any site files at their respective agencies.

Approval of the landfill remediation completed by the City of Cupertino in 1999 by the SCCDEH is pending. Based on scope of services performed for this ESAU, Dames & Moore does not recommend further investigation of the subject property at this time.

**UST's**  
**SRC#: 5721** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for City of Palo Alto Underground Storage Tank List was December, 1998.

This database is provided by the City of Palo Alto Fire Department. The agency may be contacted at: 650-329-2184.

**UST's**  
**SRC#: 5837** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for City of Santa Clara Underground Storage Tanks was April, 1999.

This database is provided by the City of Santa Clara, Fire Department. The agency may be contacted at: 408-984-4109.

**UST's**  
**SRC#: 5946** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for Sunnyvale City UST List was January, 1999.

This database is provided by the City of Sunnyvale Department of Public Safety. The agency may be contacted at: 408-730-7212.

**UST's**  
**SRC#: 6111** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for City of San Jose Underground Storage Tanks List was April, 1999.

This database is provided by the City of San Jose Fire Department. The agency may be contacted at: 408-277-4659.

**UST's**  
**SRC#: 6121** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for City of Milpitas UST List was July, 1999.

This database is provided by the City of Milpitas Fire Department. The agency may be contacted at: 408-942-3265.

**AST's**  
**SRC#: 5513** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for Aboveground Storage Tank Database was December, 1998.

This database is provided by the State Water Resources Control Board. The agency may be contacted at: 916-227-4364.

**TRIS**  
**SRC#: 4946** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for TRIS was January, 1998.

Section 313 of the Emergency Planning and Community Right-to-Know Act (also known as SARA Title III) of 1986 requires the EPA to establish an inventory of Toxic Chemicals emissions from certain facilities( Toxic Release Inventory System). Facilities subject to this reporting are required to complete a Toxic Chemical Release Form(Form R) for specified chemicals.

**D) DATABASES SEARCHED TO 1/8 MILE**

**ERNS** VISTA conducts a database search to identify all sites within 1/8 mile of your property.  
**SRC#: 5598** The agency release date for was December, 1998.

The Emergency Response Notification System (ERNS) is a national database containing records from October 1986 to the release date above and is used to collect information for reported releases of oil and hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the US Coast Guard, the National Response Center and the Department of Transportation. The ERNS hotline number is (202) 260-2342.

**RCRA-LgGen** VISTA conducts a database search to identify all sites within 1/8 mile of your property.  
**SRC#: 5896** The agency release date for HWDMS/RCRIS was May, 1999.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Large Generators are facilities which generate at least 1000 kg./month of non-acutely hazardous waste ( or 1 kg./month of acutely hazardous waste).

**RCRA-SmGen** VISTA conducts a database search to identify all sites within 1/8 mile of your property.  
**SRC#: 5896** The agency release date for HWDMS/RCRIS was May, 1999.

The EPA's Resource Conservation and Recovery Act (RCRA) Program Identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Small and Very Small generators are facilities which generate less than 1000 kg./month of non-acutely hazardous waste.

# SITE ASSESSMENT PLUS REPORT (PROPERTY BOUNDARY EXTENDED 1/2 MILE)

## DESCRIPTION OF DATABASES SEARCHED

### A) DATABASES SEARCHED TO 1 MILE

**NPL** VISTA conducts a database search to identify all sites within 1 mile of your property.  
**SRC#: 5984** The agency release date for NPL was July, 1999.

The National Priorities List (NPL) is the EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. A site must meet or surpass a predetermined hazard ranking system score, be chosen as a state's top priority site, or meet three specific criteria set jointly by the US Dept of Health and Human Services and the US EPA in order to become an NPL site.

**SPL** VISTA conducts a database search to identify all sites within 1 mile of your property.  
**SRC#: 5949** The agency release date for Calsites Database: Annual Workplan Sites was April, 1999.

THE TEXAS SOLID WASTE FACILITIES PERMIT APPLICATIONS FILE CURRENTLY INCLUDES RECORDS WITH ADDRESSES THAT HAVE LITTLE LOCATIONAL VALUE. A SMALL SAMPLING OF THESE SITES WILL BE INCLUDED IN THE UNMAPPABLE SECTION OF VISTA REPORTS. THE TNRCC IS DEVELOPING A GIS DATABASE FOR SOLID WASTE FACILITIES THAT WILL INCLUDE MAPPABLE LOCATION. UNTIL THIS DATABASE IS AVAILABLE, VISTA ENCOURAGES FURTHER INVESTIGATION BY THE ENVIRONMENTAL PROFESSIONAL TO LOCATE ALL POSSIBLE LANDFILLS IN THE AREA.

**CORRACTS** VISTA conducts a database search to identify all sites within 1 mile of your property.  
**SRC#: 5896** The agency release date for HWDMS/RCRIS was May, 1999.

The EPA maintains this database of RCRA facilities which are undergoing "corrective action". A "corrective action order" is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

### B) DATABASES SEARCHED TO 1/2 MILE

**CERCLIS** VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
**SRC#: 6078** The agency release date for CERCLIS was May, 1999.

The CERCLIS List contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL. The information on each site includes a history of all pre-remedial, remedial, removal and community relations activities or events at the site, financial funding information for the events, and unrestricted enforcement activities.

For more information call VISTA Information Solutions, Inc. at 1 - 800 - 767 - 0403.

Report ID: 871204300

Date of Report: September 9, 1999

Version 2.6.1

Page #23

**Cal Cerclis**  
**SRC#: 2462**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for Ca Cerclis w/Regional Utility Description was June, 1995.

The CalSites database contains information on properties (or "sites") in California where hazardous substances have been released, or where the potential for such a release exists. This database is used primarily by the Department of Toxic Substances Control to evaluate and track activities at sites that may have been affected by the release of hazardous substances. Also see SPL/SCL: Annual Work Plan (AWP) sites are classified as SPL and all the other sites are classified as SCL.

**NFRAP**  
**SRC#: 6079**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for CERCLIS-NFRAP was May, 1999.

NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

**SCL**  
**SRC#: 5948**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for Calsites Database: All Sites except Annual Workplan Sites (incl. ASPIS) was April, 1999.

The CalSites database contains information on properties (or "sites") in California where hazardous substances have been released, or where the potential for such a release exists. This database is used primarily by the Department of Toxic Substances Control to evaluate and track activities at sites that may have been affected by the release of hazardous substances. Also see SPL/SCL: Annual Work Plan (AWP) sites are classified as SPL and all the other sites are classified as SCL.

The CalSites database includes both known and potential sites. Two-thirds of these sites have been classified, based on available information, as needing "No Further Action" (NFA) by the Department of Toxic Substances Control. The remaining sites are in various stages of review and remediation to determine if a problem exists at the site. Several hundred sites have been remediated and are considered certified. Some of these sites may be in long term operation and maintenance.

**RCRA-TSD**  
**SRC#: 5896**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for HWDMs/RCRIS was May, 1999.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDs are facilities which treat, store and/or dispose of hazardous waste.

**SWLF**  
**SRC#: 5942**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for Ca Solid Waste Information System (SWIS) was April, 1999.

This database is provided by the Integrated Waste Management Board. The agency may be contacted at: 916-255-4021.

The California Solid Waste Information System (SWIS) database consists of both open as well as closed and inactive solid waste disposal facilities and transfer stations pursuant to the Solid Waste Management and Resource Recovery Act of 1972, Government Code Section 2.66790(b). Generally, the California Integrated Waste Management Board learns of locations of disposal facilities through permit applications and from local enforcement agencies.

**SWLF**  
**SRC#: 5945**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **City of Los Angeles Landfills** was **April, 1999**.

This database is provided by the City of Los Angeles, Environmental Affairs Department. The agency may be contacted at: 213-580-1070.

**WMUDS**  
**SRC#: 5857**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **Waste Management Unit Database System (WMUDS)** was **February, 1999**.

This database is provided by the State Water Resources Control Board. The agency may be contacted at: 916-892-0323. These are voluntary deed restriction agreements with owners of property who propose building residences, schools, hospitals, or day care centers on property that is "on or within 2,000 feet of a significant disposal of hazardous waste".

The WMUDS system also accesses information from the following databases from the Waste Discharger System (WDS): Inspections, Violations, and Enforcements. The sites contained in these databases are subject to the California Code of Regulations - Title 23. Waters.

**LUST**  
**SRC#: 4579**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **Region #2-North and South Bay SLIC Report** was **January, 1998**.

This database is provided by the Regional Water Quality Control Board, Region #2. The agency may be contacted at: 510-286-1269.

**LUST RG6**  
**SRC#: 5670**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **Lahontan Region LUST List** was **January, 1999**.

This database is provided by the Lahontan Region Six South Lake Tahoe. The agency may be contacted at: 530-542-5400.

**LUST RG3**  
**SRC#: 6021**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **Region #3-Central Coast Region LUST List** was **June, 1999**.

This database is provided by the Regional Water Quality Control Board, Region #3. The agency may be contacted at: 805-542-4695.

**LUST**  
**SRC#: 6024**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **Lust Information System (LUSTIS)** was **April, 1999**.

This database is provided by the California Environmental Protection Agency. The agency may be contacted at: 916-445-6532.

**LUST**  
**SRC#: 6112**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **Region #3-Central Coast Region SLIC List** was **July, 1999**.

This database is provided by the Regional Water Quality Control Board, Region #3. The agency may be contacted at: 805-542-3399.

**LUST RG2**  
**SRC#: 6120**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for Region #2-San Francisco Bay Fuel Leaks List was June, 1999.

This database is provided by the Regional Water Quality Control Board, Region #2. The agency may be contacted at: 510-286-1269.

**CORTESE**  
**SRC#: 4840**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for Cortese List-Hazardous Waste Substance Site List was April, 1998.

This database is provided by the Office of Environmental Protection, Office of Hazardous Materials. The agency may be contacted at: 916-445-6532.

The California Governor's Office of Planning and Research annually publishes a listing of potential and confirmed hazardous waste sites throughout the State of California under Government Code Section 65962.5. This database (CORTESE) is based on input from the following: (1)CALSTATES-Department of Toxic Substances Control, Abandoned Sites Program Information Systems; (2)SARA Title III Section III Toxic Chemicals Release Inventory for 1987, 1988, 1989, and 1990; (3)FINDS; (4)HWIS-Department of Toxic Substances Control, Hazardous Waste Information System. Vista has not included one time generator facilities from Cortese in our database.; (5)SWRCB-State Water Resources Control Board; (6)SWIS-Integrated Waste Management Control Board (solid waste facilities); (7)AGT25-Air Resources Board, dischargers of greater than 25 tons of criteria pollutants to the air; (8)A1025-Air Resources Board, dischargers of greater than 10 and less than 25 tons of criteria pollutants to the air; (9)LTANK-SWRCB Leaking Underground Storage Tanks; (10)UTANK-SWRCB Underground tanks reported to the SWEEPS systems; (11)IUR-Inventory Update Rule (Chemical Manufacturers); (12)WB-LF- Waste Board - Leaking Facility, site has known migration; (13)WDSE-Waste Discharge System - Enforcement Action; (14)DTSCD-Department of Toxic Substance Control Docket.

**Deed**  
**Restrictions**  
**SRC#: 1703**

VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for Deed Restriction Properties Report was April, 1994.

This database is provided by the Department of Health Services-Land Use and Air Assessment. The agency may be contacted at: 916-255-2014.

California has a statutory and administrative procedure under which the California Department of Health Services (DHS) may designate real property as either a "Hazardous Waste Property" or a "Border Zone Property" pursuant to California Health Safety Code Sections 25220-25241. Hazardous Waste Property is land at which hazardous waste has been deposited, creating a significant existing or potential hazard to public health and safety. A Border Zone Property is one within 2,000 feet of a hazardous waste deposit. Property within either category is restricted in use, unless a written variance is obtained from DHS. A Hazardous Waste Property designation results in a prohibition of new uses, other than a modification or expansion of an industrial or manufacturing facility on land previously owned by the facility prior to January 1, 1981. A Border Zone Property designation results in prohibition of a variety of uses involving human habitation, hospitals, schools and day care center.

**Toxic Pits**  
**SRC#: 2229** VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **Summary of Toxic Pits Cleanup Facilities** was **February, 1995**.

This database is provided by the Water Quality Control Board, Division of Loans Grants. The agency may be contacted at: 916-227-4396. These are regional utility descriptions for California CERCLIS sites.

**South Bay**  
**SRC#: 1719** VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **South Bay Site Management System** was **April, 1994**.

This database is provided by the San Francisco Bay Region. The agency may be contacted at: .

**Water Wells**  
**SRC#: 5384** VISTA conducts a database search to identify all sites within 1/2 mile of your property.  
The agency release date for **USGS WATER WELLS** was **March, 1998**.

The Ground Water Site Inventory (GWSI) database was provided by the United States Geological Survey (USGS). The database contains information for over 1,000,000 wells and other sources of groundwater which the USGS has studied, used, or otherwise had reason to document through the course of research. The agency may be contacted at 703-648-6819.

### C) DATABASES SEARCHED TO 1/4 MILE

**RCRA-Viols/En** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for **HWDMS/RCRIS** was **May, 1999**.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Violators are facilities which have been cited for RCRA Violations at least once since 1980. RCRA Enforcements are enforcement actions taken against RCRA violators.

**UST's**  
**SRC#: 1612** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for **Underground Storage Tank Registrations Database** was **January, 1994**.

This database is provided by the State Water Resources Control Board, Office of Underground Storage Tanks. The agency may be contacted at: 916-227-4364.

**UST's**  
**SRC#: 5495** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for **City of Mountain View Underground Storage Tank List** was **December, 1998**.

This database is provided by the Mountain View Fire Department. The agency may be contacted at: 650-903-6378.

**UST's**  
**SRC#: 5677** VISTA conducts a database search to identify all sites within 1/4 mile of your property.  
The agency release date for **Hazmat Facilities Database, Underground Storage Tanks of Santa Clara County** was **January, 1999**.

This database is provided by the Santa Clara County Fire Department. The agency may be contacted at: 408-378-4010.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

# Certified Sanborn® Map Report

03/23/18

**Site Name:**

Linda Vista  
Not Reported  
Cupertino, CA 95014  
EDR Inquiry # 5231980.3

**Client Name:**

Haley & Aldrich, Inc.  
2033 N. Main Street  
Walnut Creek, CA 94596  
Contact: Marie Rose Javier

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Haley & Aldrich, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 8FC8-4285-A864

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Haley & Aldrich, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA CORRACTS facilities list***

## EXECUTIVE SUMMARY

**CORRACTS:** CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>CANDESCENT TECHNOLOG</b>	<b>10460 BUBB RD</b>	<b>NE 1/2 - 1 (0.943 mi.)</b>	<b>B7</b>	<b>20</b>

### **State- and tribal - equivalent CERCLIS**

**ENVIROSTOR:** The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2018 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 11/10/2009  
Comments: Soil samples were collected from within the footprint of a proposed play area and analyzed for organochlorine pesticides and metals because of the possible historical use of a nearby parcel for agricultural use. There were some exceedances of human health risk-based screening levels for lead and toxaphene. In May 2009, approximately 72 cubic yards of soil was excavated to address the locations where there were exceedances of screening levels and the excavated soil was disposed at a permitted, off-site Class II landfill. The Soil Removal Completion Report presents the results of soil sampling and documents the soil removal. DTSC issued a no further action letter to the City of Cupertino based on the information presented in the Report and determined that the proposed play area has been made suitable for unrestricted use.

In May 2009, approximately 72 cubic yards of soil was excavated to address the locations where there were exceedances of screening levels and the excavated soil was disposed at a permitted, off-site Class II landfill. The Soil Removal Completion Report presents the results of soil sampling and documents the soil removal. DTSC issued a no further action letter to the City of Cupertino based on the information presented in the Report and determined that the proposed play area has been made suitable for unrestricted use.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/21/2018
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 01/05/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/26/2017	Telephone: 800-424-9346
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 02/09/2018
Number of Days to Update: 94	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Federal ERNS list**

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/18/2017

Date Data Arrived at EDR: 09/21/2017

Date Made Active in Reports: 10/13/2017

Number of Days to Update: 22

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 01/19/2018

Next Scheduled EDR Contact: 04/09/2018

Data Release Frequency: Quarterly

## **State- and tribal - equivalent NPL**

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/30/2018

Date Data Arrived at EDR: 01/31/2018

Date Made Active in Reports: 03/19/2018

Number of Days to Update: 47

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 01/31/2018

Next Scheduled EDR Contact: 05/14/2018

Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/30/2018

Date Data Arrived at EDR: 01/31/2018

Date Made Active in Reports: 03/19/2018

Number of Days to Update: 47

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 01/19/2018

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 01/09/2018  
Date Data Arrived at EDR: 01/24/2018

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: Quarterly

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 08/30/2016	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 09/08/2016	Telephone: 301-415-7169
Date Made Active in Reports: 10/21/2016	Last EDR Contact: 01/19/2018
Number of Days to Update: 43	Next Scheduled EDR Contact: 05/21/2018
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 08/07/2009	Telephone: 202-586-8719
Date Made Active in Reports: 10/22/2009	Last EDR Contact: 03/09/2018
Number of Days to Update: 76	Next Scheduled EDR Contact: 06/18/2018
	Data Release Frequency: Varies

## COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 07/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/10/2014	Telephone: N/A
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 03/06/2018
Number of Days to Update: 40	Next Scheduled EDR Contact: 06/18/2018
	Data Release Frequency: Varies

## PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 05/24/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/30/2017	Telephone: 202-566-0517
Date Made Active in Reports: 12/15/2017	Last EDR Contact: 01/26/2018
Number of Days to Update: 15	Next Scheduled EDR Contact: 05/07/2018
	Data Release Frequency: Varies

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/02/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/05/2017	Telephone: 202-343-9775
Date Made Active in Reports: 10/13/2017	Last EDR Contact: 01/04/2018
Number of Days to Update: 8	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

	Data Release Frequency: Varies

## Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 11/14/2017	Source: California Integrated Waste Management Board
Date Data Arrived at EDR: 11/17/2017	Telephone: 916-341-6066
Date Made Active in Reports: 12/18/2017	Last EDR Contact: 02/08/2018
Number of Days to Update: 31	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2016	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/12/2017	Telephone: 916-255-1136

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/03/2018  
Date Data Arrived at EDR: 02/14/2018

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

LINDA VISTA  
NOT REPORTED  
CUPERTINO, CA 95014

### TARGET PROPERTY COORDINATES

Latitude (North):	37.30541 - 37° 18' 19.48"
Longitude (West):	122.064135 - 122° 3' 50.89"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	582938.4
UTM Y (Meters):	4128960.0
Elevation:	723 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	5640178 CUPERTINO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06085C0212H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06085C0204H	FEMA FIRM Flood data
06085C0208H	FEMA FIRM Flood data
06085C0216H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CUPERTINO	YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

Era: Cenozoic  
System: Tertiary  
Series: Pliocene  
Code: Tpc *(decoded above as Era, System & Series)*

### **GEOLOGIC AGE IDENTIFICATION**

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: gravelly - loam clay

Surficial Soil Types: gravelly - loam clay

Shallow Soil Types: clay loam clay

Deeper Soil Types: unweathered bedrock

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## **APPENDIX D**

### **Vapor Screening Evaluation**

Vapor Migration Screening Matrix  
Linda Vista Subdivision  
Cupertino, CA  
File No. 132115-002

Haley & Aldrich's ASTM Phase I Vapor Migration Screening Matrix includes: a Chemicals of Concern Test, and a Critical Distance Test modified from guidance presented in the ASTM E 2600-10 Standard.

(1) Search Radius Test: Is there any known soil or groundwater contamination on properties within 100 feet of the subject site?

Yes  No

If No then screening is complete and potential Vapor Migration is not a concern. Go to #4. If Yes, continue with questionnaire.

(2) Chemicals of Concern (COC) Test: Are the COCs detected at the nearby site volatile organic compounds (VOCs) or volatile petroleum constituents?

Yes  No

If No then screening is complete and potential Vapor Migration is not a concern. Go to #4. If Yes, continue with questionnaire.

(3) Available Information Test:

(3a): Is information available related to specific location and concentrations of COCs detected at the nearby site (i.e. data tables, site drawings or iso-concentration maps)?

Yes  No

If No then Vapor Migration cannot be ruled out; check Yes in #4 below indicating that possible Vapor Migration Exists. If Yes then continue to question #3b below and check Yes in #4 below.

(3b): For nearby sites contaminated with dissolved petroleum constituents only, is the subject site less than 30 feet to the nearest edge of the boundary of the volatile COC plume?

Yes  No

If No then screening is complete and potential Vapor Migration is not a concern. Go to #4. If Yes, then potential Vapor Migration is a concern. Check Yes in #4 below.

(4) Does potential vapor migration exist beneath the site?

Yes  No

If No then Vapor Migration screening is complete and no further investigation is recommended at this time. If Yes, then additional site specific assessment to address potential impact of vapor migration may be warranted.
