

FREE Do-IT-YOURSELF WORKSHOP

Many of the activities we do everyday like turn the lights on, cook food, or heat or cool our homes rely on the burning of dirty fuels, which emit carbon dioxide and cause climate change.

Save money and protect the planet at home!

At the Do-It-Yourself (DIY) workshop you will learn to:

- Assess your own energy and water use
- Understand your energy bill
- Install basic energy- and water-saving devices at home
- Develop a simple conservation plan

You can take home to install:

- A retractable clothesline
- Low-flow water devices
- Weather stripping
- Compact-fluorescent light bulbs

The next DIY workshop
will be in:

Cupertino

Monday, May 23

5:30 p.m. – 9:00 p.m.

To register and for more
information, please contact
Deb Kramer at
