### Small planting areas less than 48" parkways & areas with overhead high voltage.

- Lagerstroemia X Fauriei***. 'Tuscarora'-- A deciduous tree also known as 'Crape Myrtle'. It can grow to 30 feet in height. 1 – 2 inch oval, glossy leaves producing deep coral pink flowers in July-September. It is considered to be mildew resistant. The tree can be seen at De Anza Blvd median strip (north-end) between Mariani Ave & 280 Freeway.
- Acer buergerianum*** -- is a small, rounded, deciduous tree known as 'trident maple' that typically grows rather slowly to 20-30 feet. Leaves are Triangular, three-lobed, glossy green above and pale green beneath that are 3 ½ inches long and 2 inches wide. Variable but usually attractive fall color features shades of dark red and orange. Non-showy, greenish-yellow flowers bloom in spring (April-May) to inch long that mature in the fall. Exfoliating bark will develop on mature trunks.
- Arburus 'marina'***-- An evergreen tree known as 'Marina Strawberry tree' slow growing to 30 feet tall with a broad dense canopy. The upright branches are covered with a smooth mahogany colored bark which exfoliates to expose new bark. Dark green leaves 4-5 inches long. The pendulous clusters of urn-shaped pink flowers are produced year-round. The fruit that follows is yellow, orange, and dark red. These trees can be seen in the lawn near the main entrance at city hall.
- Tristaniopsis laurina***. An evergreen tree known as 'Kanooka' or 'Water Gum'. Slow growing tree reaching up to 30' high with a thick, 30' canopy. Leaves lanceolate to ovate, glossy medium green in color. Showy, fragrant, yellow flowers with a multi colored trunk.

### Medium Planting areas: 48-60" parkways

- Tristania. conferta*** -- An evergreen tree known as 'Brisbane Box'. Is moderate to fast growing to 30-40 feet. Trunk and limbs resemble those of the madrone, with reddish brown bark peeling away to show smooth light colored bark. Upright growth with a rounded canopy. Leaves are 4-6 inches long and are oval, leathery, and bright green. Flowers in clusters 3-7 in summer ¾ inch across, white to creamy. This tree can be seen on Blaney Ave north of Stevens Creek Blvd.
- Arburus 'marina'***-- An evergreen tree known as 'Marina Strawberry tree' slow growing to 30 feet tall with a broad dense canopy. The upright branches are covered with a smooth mahogany colored bark which exfoliates to expose new bark. Dark green leaves 4-5 inches long. The pendulous clusters of urn-shaped pink flowers are produced year-round. The fruit that follows is yellow, orange, and dark red. These trees can be seen in the lawn near the main entrance at city hall.
- Pistacia. Chinesis*** -- A deciduous tree known at 'Chinese Pistache', a shade tree that grows to 40 feet in height. Leaves are narrow up to 4 inches long turning to a vivid red, yellow and orange in fall. This tree can be seen at City Hall on Rodrigues Ave @ Torre Ave.
- Gingko biloba***. 'Autumn Gold' – Deciduous tree known as 'Maidenhair' that grows to 30 – 50 feet in height. Broad, fan shaped leaves turning gold in fall. Not generally bothered by insects or diseases. It is resistant to oak root fungus, Fruitless.
- Acer. rubrum***. 'October Glory' – A deciduous tree known as 'Red Maple', grows to a height of 40 – 60 feet with a spread of 25 – 45 feet. Leaves are 2 – 5 inches long with 3 – 5 lobes, are green on top with a pale bottom. As fall approaches the leaves turn to a brilliant scarlet red. It tolerates most soils. Occasional deep watering and periodic feeding will help keep roots deep.
- Koelreuteria bipinnata***. -- A deciduous tree known as 'Chinese Flame Tree' grows to a height of 30 – 40 feet with a spread up to 30 – 40 feet. Blooms in June with yellow showy flower clusters to 15 inches long. Fruit is inflated papery-walled capsule, turning from red to copper-colored and brown in the fall.
- Tristanopsis laurina***. An evergreen tree known as 'Kanooka' or 'Water Gum'. Slow growing tree reaching up to 30' high with a thick, 30' canopy. Leaves lanceolate to ovate, glossy medium green in color. Showy, fragrant, yellow flowers with a multi colored trunk.

### Large Planting areas: 60" or greater parkways & plantings behind sidewalk

- Quercus suber*** -- is a medium sized semi-deciduous tree known as 'Cork oak'. The bark from this tree is famously used as wine bottle corks. They grow to a mature height of 40-50 feet tall and are attractive oaks. Leaves are leathery, wavy-toothed, ovate, shiny, and dark green 2-4" long are gray below. Thick, rough, deeply fissured, corky bark with reddish-brown furrows has a unique beauty, particularly on older trees. Fruits are narrow oval-oblong acorns, growing to 1.25 inches long.
- Quercus bucklyi*** -- is a deciduous tree known as 'Texas Red Oak'. It is a medium sized tree with spreading branches. It grows 30 to 50 feet tall by 40 feet wide. The foliage turns bright shades of vivid red and orange in autumn. Some trees hold their dead leaves until spring when new leaves emerge. The bark is dark gray to black with plate like scales, and is sometimes light gray and smooth.
- Fraxinus americana*** -- is a deciduous shade tree known as 'Autumn Purple Ash' it has large glossy green leaves and a brilliant fall display of red fading to a deep purple. It holds its fall color longer than almost any other trees growing in Cupertino. Its leaves are 1-2 inches wide by 3-4 inches long. Its smooth grey bark becomes furrowed when mature. This tree is fast growing, (3-4 feet a year) when given ample water.
- Tilia tomentosa*** 'sterling silver' -- is a deciduous tree known as 'sterling silver linden' noted for its attractive foliage, which is glossy green above and silvery-white below. The foliage flutters in the slightest breeze, showcasing the silver and green leaf colors. This is a medium sized deciduous tree, typically growing to 50 feet tall with upright branching and a broad-columnar
- Acer. rubrum*** 'October Glory' – A deciduous tree known as 'Red Maple', grows to a height of 40 – 60 feet with a spread of 25 – 45 feet. Leaves are 2 – 5 inches long with 3 – 5 lobes, are green on top with a pale bottom. As fall approaches the leaves turn to a brilliant scarlet red. It tolerates most soils. Occasional deep watering and periodic feeding will help keep roots deep.
- Platinus X Acerfolia*** 'Colombia' – a large deciduous tree known as 'London Plane Tree' that grows to 50feet at maturity displaying a pyramidal shape when young. Foliage has medium to dark green leaves 6–7 inches long, 8–10 inches wide. Leaves are 5-lobed. Bark is exfoliating, varying from yellow-green to greyed-green. Dry fuzzy fruit balls are generally produced in 2's and 3's.
- Quercus agrifolia*** -- is a large California native shade tree known as 'Coast Live Oak' with a dense broad canopy with handsome smooth grey bark. Its leaves are dark green ¾ to 1 inches wide by 1½ inches long. Leaves are thick with tinny points on its edges much like a holly leaf. Mature height reaches 50-60 feet with equal spread. This tree does not do well in turf areas as it is sensitive to overwatering. Once established this tree should rarely need irrigating.

## CITY OF CUPERTINO NEIGHBORHOOD THEMED STREET TREES

### Area A:

***Pyrus Calleryana*** 'Chanticleer' -- A deciduous tree known as 'Flowering Pear'. Grows fast to 35' in height and has a columnar shape. Leaves are glossy and oval growing to 3 inches long. Small, white clustered flowers appear late winter/early spring. Leaves turn to a purple red in fall. Tree can be seen on Stevens Creek Blvd roadside from De Anza Blvd to Portal Rd.

### Area B:

***Fraxinus uhdei*** -- is a semi deciduous tree known as 'shamel Ash' that reaches heights of 80 feet by 60 feet wide. Its large 2 by 4 inch leaves provide excellent shade. It produces inconspicuous flowers turning to clusters of green seeds that turn brown in the fall, eventually dropping in the spring in large quantities. This tree can be seen along Wolfe road between Stevens Creek Blvd and Homestead Rd. Due to its size this tree is only recommended for large planting locations.

### Area C:

***Fraxinus americana*** -- is a deciduous shade tree known as 'Autumn Purple Ash' it has large glossy green leaves and a brilliant fall display of red fading to a deep purple. It holds its fall color longer than almost any other trees growing in Cupertino. Its leaves are 1-2 inches wide by 3-4 inches long. Its smooth grey bark becomes furrowed when mature. This tree is fast growing, (3-4 feet a year) when given ample water.

***Quercus cambyi*** -- is a deciduous tree known as 'Sierra Oak', or 'Texas Oak' it is a red oak that naturally grows in a pyramidal shape while it is young, developing into a broader canopy after several years. With a mature size of 30 feet tall and equal spread, it is an ideal oak tree for Cupertino neighborhoods. Although it's classified as an evergreen, it will shed a majority of its leaves in the late winter. New foliage is red before turning a rich green color, turning red again in the fall. Leaves are up to three inches long, and resemble a holly leaf.

***Quercus frainetto*** 'Schmidt' -- is a deciduous tree known as 'Forest Green Oak' is upright growing to 40 – 50 feet with a spread of 25 – 30 feet. Oval shaped tree of Hungarian descent. It features deep green, glossy foliage with deeply lobed leaves with yellow brown fall color. The strong central trunk gives this tree a stately appearance. This tree will make a great addition to any yard. It grows best in Full Sun, but will tolerate Full Shade. Drought tolerant once established.

***Tilia tomentosa*** 'sterling silver' -- is a deciduous tree known as 'sterling silver linden' noted for its attractive foliage, which is glossy green above and silvery-white below. The foliage flutters in the slightest breeze, showcasing the silver and green leaf colors. This is a medium sized deciduous tree, typically growing to 50 feet tall with upright branching and a broad-columnar habit. Fragrant pale yellow flowers in drooping cymes appear in late spring to early summer (June-July). Flowers are followed by small nutlets attached to narrow, bract-like, strap-shaped leafy wings 2.5 inches long. nutlets ripen in late summer. Ovate, shiny, dark green leaves to 4 inches long with acuminate tips and serrate margins are densely covered beneath with silvery-white hairs. Fall color is an undistinguished pale green to pale yellow.

### Area D:

***Quercus agrifolia*** -- is a large California native shade tree known as 'Coast Live Oak' with a dense broad canopy with handsome smooth grey bark. Its leaves are dark green ¾ to 1 inches wide by 1½ inches long. Leaves are thick with tinny points on its edges much like a holly leaf. Mature height reaches 50-60 feet with equal spread. This tree does not do well in turf areas as it is sensitive to overwatering. Once established this tree should rarely need irrigating.

### Area E:

***Platanus X Acerfolia*** 'Colombia' – a large deciduous tree known as 'London Plane Tree' that grows to 50 feet at maturity displaying a pyramidal shape when young. Foliage has medium to dark green leaves 6–7 inches long, 8–10 inches wide. Leaves are 5-lobed. Bark is exfoliating, varying from yellow-green to greyed-green. Dry fuzzy fruit balls are generally produced in 2's and 3's.
