

DEPARTMENT OF PUBLIC WORKS  
POLICY  
STORM DRAIN PIPE MATERIAL  
IN THE PUBLIC RIGHT OF WAY

All new storm drain piping, whether the facilities are public or private, which are located and installed within the Public Right of Way shall be Reinforced Concrete Pipe (RCP) material, unless expressly permitted otherwise by the Director of Public Works.

The Director of Public Works reserves the right to modify, reject or approve pipe material during construction, regardless of the type of material that is indicated on improvement plans.

It is the owner's and engineer's responsibility to ensure that the plans indicate Reinforced Concrete Pipe, and it is the owner's and contractor's responsibility to ensure that reinforced concrete pipe is installed in the field.
